The simplicity you want and reliability you need.

RelyX™ Veneer Cement is a veneer cement system with a customer-preferred color shading system that is easy to use and clean up.

RelyX Veneer Cement provides simple and efficient bonding of porcelain, composite and ceramic veneers. Combined with the 3M™ ESPE™ RelyX™ Try-In Pastes, the cement provides a simple and efficient way to perform veneer procedures.

- Optimal color match of the water-soluble try-in pastes to the cured cement shade
- Excellent color stability
- Ideal viscosity of the cement for easy insertion and positioning of the veneer

Features and Benefits:

Customer-preferred delivery and shading system is easy to use.

Try-in pastes are water soluble and residue-free and offer excellent color match to the final cured cement for better patient satisfaction.

Easy to clean up.

Ideal, non-slump cement viscosity prevents veneer drift and is easy to dispense, apply and seat.

RelyX™ Veneer Cement's excellent adhesion to dentin and enamel reduces the potential for microleakage and marginal staining.

Light-cure only, resin-based cement provides exceptional color stability. Additionally, the cement cures with a wide range of light sources.

Available in six commonly used and preferred shades: Translucent, White Opaque, A1/Light Yellow, A3 Opaque/Yellow Opaque, A5 Opaque/Dark and B0.5/White.

Fast and easy bonding with Scotchbond™ Universal.

Scotchbond Universal is a single-bottle adhesive solution by 3M ESPE. It reliably bonds to all surfaces, including enamel, dentine, porcelain, composites and ceramic. Scotchbond Universal also functions as a silane primer for glass ceramic and composite veneers. This eliminates the need for a separate primer and more importantly reduces your inventory.

Ordering Information

Item No.	Product Information
	RelyX™ Veneer Cement
8716	**RelyX™ Veneer Cement Intro Kit:** 1 syringe cement Translucent 3 g; 1 syringe cement White Opaque 3 g; 1 syringe cement A1/Light Yellow 3 g; 1 syringe cement A3 Opaque/Yellow Opaque 3 g; 1 syringe cement B0.5/White 3 g; 1 syringe try-in paste Translucent 2 g; 1 syringe try-in paste White Opaque 2 g; 1 syringe try-in paste A1/Light Yellow 2 g; 1 syringe try-in paste A3 Opaque/Yellow Opaque 2 g; 1 syringe try-in paste B0.5/White 2 g; 1 Scotchbond™ Universal 5 ml vial; 1 Scotchbond™ Universal Etchant 3 ml syringe; 25 Etchant Tips; 48 White Mix Wells; 50 Scotchbond™ Microbrushes; Step-by-Step Technique Guide
