The Red Tag Disc Media Protection System

Lock in a higher level of security

As one of the most innovative disc media solutions available today, the Red Tag system is a simple, cost-effective way to protect your entire disc media collection. This secure solution eliminates the need to store a disc separately from the case. It's also very easy to use, so staff can spend less time handling discs and more time providing personal service. The disc is locked in place simply by inserting the locking tag into a case and passing it under the hub of the disc. At checkout, the tag can be removed in seconds. Each tag is reusable and extremely durable, reducing costs and providing the level of security you need.

Easy to Use

- Simple to implement
- Reduces transaction time

Enhances Productivity and Customer Experience

- Eliminates the need for storing discs separately from the cases
- Reliable method of protection reduces theft and helps ensure that discs are available when customers want them
- Compact components allow for multiple checkout options

Reliable Security

- Protects against disc media theft
- Dual function locking tag secures one disc to the case and keeps the case locked
- Compatible with other 3M disc media solutions like 3M™ Tattle-Tape™ Security Strips DCD-2 and 3M™ RFID Tags.
- Includes a lockable Red Tag De-Tagger
