3M™ Eye Protection

3M™ SecureFit™ Safety Spectacles 400 Series

Recognising that lack of comfort and fit are two of the biggest barriers to protective eyewear use, 3M has introduced a revolutionary range of safety eyewear which self-adjusts to individual head sizes, delivering noticeably higher levels of personal comfort and security of fit. Weighing just 19g, the lightweight eyewear adjusts to fit a wide array of head sizes, reducing the need to stock multiple frame sizes.

The 3M™ SecureFit™ Protective Eyewear features patented 3M™ Pressure Diffusion Temple Technology which draws on years of scientific anthropometric research by 3M. This game-changing technology allows the frames to naturally adjust to the wearer's profile, providing a snug, stylish and secure fit across a diverse workforce, without compromising safety.

The SF400 series also offers enhanced comfort through the addition of dual-injected padded temple touchpoints and soft, adjustable nosepads for even greater personalisation of fit.

Features and Benefits:

Style

- Sleek, streamline design
- The robust temple design offers great performance without the need for adjustable features

Premium Protection

- FT impact protection
- Integrated side-shield provides additional protection
- Polycarbonate lenses absorb 99.9% of UVA and UVB and meet the requirements of EN166:2001

Comfort

- Features 3M™ Pressure Diffusion Temple Technology
- Constant temple force even with different head sizes
- Reduced frame slippage during workplace head movements
- Self adjusting temples for a secure fit
- Weighs only 19g
- Dual-injected padded temple touchpoints for added comfort over the ears
- Soft, adjustable nosepads for even greater personalisation of fit
- Removable foam insert helps keep debris out of your eyes while providing comfort and cushioning
