3M™ Cooling Film
reduces interior vehicle temperatures
by up to 5.5 °C

3M™ Cooling Film

When you apply 3M™ Cooling Film to the roof of a last-mile vehicle, it reduces heat buildup at the source.

This highly reflective performance film is engineered to keep vehicles cooler without external power, improving driver comfort and helping reduce heat exposure for temperature-sensitive cargo.

Minimal maintenance is needed to sustain performance, as the durable coating resists dirt, chemicals and wear in normal operating conditions.

Key benefits

- Helps improve driver comfort by reducing interior temperatures by up to 5.5 °C.
- Quick installation minimises downtime.
- Limits heat exposure for temperature-sensitive goods.
- Reduces heat-related delays during frequent stop-and-go deliveries.
- Sturdy coating resists the elements and maintains high reflectivity that lasts.
- Backed by a 5-year warranty.
