

## Product Description

3M™ Cleaner for Matte Wrap Films is intended specifically for the cleaning of matte vinyl films such as 3M™ Wrap Film Series 1080, 3M™ Wrap Film Series 1380 and 3M™ Scotchcal™ Matte Overlamine 8520.

## Product Line

3M™ Cleaner for Matte Wrap Films 0.75 litre

## Important Notice

The cleaner is intended for industrial or professional use only.

## Product Characteristics

### Physical & Application

These are indicative values for unprocessed products.  
Contact your 3M representative for a custom specification.

Application temperature (minimum air and substrate): +16°C to +25°C

Substrate type: Matte vinyl films

The values above are the results of illustrative lab test measurements and shall not be considered as a commitment from 3M.

## Storage

Shelf life: Use within 4 years from the date of manufacture on the sealed original container  
Use within 2 years after opening the container

Storage conditions: +10°C to +30°C, out of sunlight, original container in clean and dry area

The shelf life as defined above remains an indicative and maximum data, subject to many external and non-controllable factors. It may never be interpreted as warranty.

## Safety

When handling any chemical products, read the manufacturers' container labels and the Safety Data Sheets (SDS) for important health, safety and environmental information and follow the manufacturers' instructions for safe operation.

The use of gloves, goggles and respirator is recommended.

Visit the web site of your local subsidiary at [www.3Mgraphics.com](http://www.3Mgraphics.com) for getting the Safety Data Sheets.

## Limitations of End Uses

3M specifically does not recommend or warrant the following uses, but please contact us to discuss your needs to recommend other products

- Use of cleaner for glossy films
- Use on other materials than matte vinyl films

**Important Notice**

Repaired or re-sprayed paint surfaces may be adversely affected by cleaning solutions. Customers are advised to test the 3M Cleaner for Matte Wrap Films in an inconspicuous area of the surface to ensure it removes the contaminant without damage. 3M does not accept liability for any damage to such surfaces.

The contact of the cleaner to rubber and plastic car parts should be avoided.

**Usage Details**

It is recommended to wash the car regularly. Automated car wash (without hot wax) is recommended to remove light dirt. Contaminants on surface areas can be cleaned by using the 3M Cleaner for Matte Wrap Films.

Put some of the cleaner on a lint-free cloth and remove the contaminant with circular movements. The use of 3M™ Scotch-Brite™ High Performance Cloth 2010 is recommended.

In case of difficult contaminants (e.g. rain water spotting) use a sponge as Scotch-Brite® Easy Eraser EE2, Scotch-Brite™ Easy Eraser 831/2 or Scotch-Brite® Easy Eraser Pad some cleaner onto the sponge and use slight pressure to remove the contaminant. Excessive pressure might create scratches on the film surface.

After cleaning the surface with 3M Cleaner for Matte Wrap Films, wipe cleaned areas with water-soaked cloth. This is to remove the cleaner contaminated with dirt from the film surface.

Dry the film using a clean soft cloth.

**Tools**

The Scotch-Brite™ and Scotch-Brite® brand include many different Easy Eraser products. Please make sure to use the products mentioned below.

- 3M™ Scotch-Brite™ High Performance Cloth 2010
- Scotch-Brite® Easy Eraser EE2
- Scotch-Brite™ Easy Eraser 831/2
- Scotch-Brite® Easy Eraser Pad
