Selecting microspheres for performance

3M™ Microspheres offer a variety of inherent advantages over typical irregularly shaped mineral fillers. And 3M can offer engineered microspheres with different sizes, strengths, densities and compositions. Combining the inherent advantages with engineered features provides a wide choice of unique potential enhancements to help you meet specific processing and end-use requirements for many applications.

More than one type of microsphere may be appropriate for an application depending on requirements for texture, processing equipment and cost. Smaller spheres can help provide a smoother feel. And some equipment can damage lower strength spheres. The following charts present 3M microspheres commonly considered for many typical applications.

enhancements

| Application Ideas | Potential Enhancements* | Product | Considerations |
|--|---|--|--|
| Auto Body Repair Filler | Reduced pinholes, lightweight sanded surface | K1, K15, S15, S22 | |
| Adhesives (Aerospace) | Weight reduction, reduced shrinkage, high filler loading/reduced VOCs | K25 | Low cost |
| | | S32, K37 | When processing requires higher strength |
| | | A16/500, A20/1000, D32/4500 | For high performance (ROV) |
| Bowling Ball Cores | Density control | K1 | Low cost |
| | | K15, K20, S32, XLD 3000 | When processing requires higher strength |
| Buoyancy (Oil and Gas) | Cost reduction, weight reduction, water resistance, sandability/machinability | A16/500, A20/1000, H20/1000, D32/4500 | For high performance |
| | | K1, K15 | Shallow water flotation |
| | | K20, K25, S32 | Deep water flotation |
| | | XLD3000 | When low density is required |
| Cast Urethane | Cost reduction, sandability/machinability, reduced warpage/shrinkage, weight reduction | K1, K15 | Low cost, low strength |
| | | K20 | Commonly used |
| Cryogenic Insulation (Bulk) | Increased insulation, decreased compaction, annulus filler | K1 | |
| Caulks | Reduced shrinkage | K1 | Low cost |
| | | K15, K20 | When processing requires higher strength |
| | | S15 | Small particle size for smooth texture |
| | | S22 | Small particle size for smooth texture |
| Cultured Marble | Sandability/machinability, weight reduction, thermal shock resistance | K1 | Low cost |
| | | K15, K20 | When processing requires higher strength |
| Furniture (Cast Polyester) | Cost reduction, sandability/machinability, reduced warpage/shrinkage, weight reduction | K1 | Low cost |
| | | K15, K20 | When processing requires higher strength |
| | | S38 | Low cost |
| Injection Molded/ Extruded Composites | Weight reduction, productivity improvements, resin displacement, improved dimensional stability | K37, K42HS, K46, S60, S60HS, S38HS, S38XHS | When processing requires higher strength |
| | | iM30K, iM16K | When extrusion/molding requires very high strength |
| Marine putties | Cost reduction, weight reduction, reduced shrinkage/warpage | K1 | Low cost |
| | | K15, K20 | When processing requires higher strength |
| Deep Sea Wet Pipe Insulation (Oil and Gas) | High strength, low thermal conductivity | S38HS | High strength |
| | | S38XHS | Extra high strength |
| | | XLD3000 | Extra low density |

* Actual enhancements realized may vary depending on a variety of factors, some of which are uniquely within the user's knowledge and control. As a result, it is essential that the user evaluate the 3M product to determine whether it is fit for a particular purpose and suitable for the user's method of application.

| Application Ideas | Potential Enhancements* | Product | Considerations |
|---|--|---|---|
| Paints (Architectural) | Improved scrubability, burnish and stain resistance | W-210, W-410, W-610 | White for easy color matching |
| | | W-210 | Smallest particle size, least gloss reduction |
| | | W-410 | 6 Hegman grind |
| Paints (Industrial & Maintenance) | Gloss control, burnish resistance, hardness, corrosion resistance, abrasion resistance, higher solids/reduced VOCs | W-610 | Maintenance paints |
| | | K37, K42HS, K46, S38, S38HS, S38XHS, S60, S60HS, iM30K, iM16K | When optimized formulation is critical |
| | | K15, K20 | Yields low density |
| Plywood Patch | Cost reduction, sandability, reduced shrinkage | A16/500, A20/1000, H20/1000 | For high performance |
| Potting Compounds (Lightweight) | Weight reduction, reduced shrinkage, reduced dielectric constant, thermal insulation | K1 | Low cost |
| | | K15, K20 | When processing requires higher strength |
| Potting Compounds (Regular Weight) | Reduced shrinkage, thermal stress crack resistance | W-610 | Small particle size |
| Powder Coatings | Abrasion resistance, improved flow | W-210 | Small particle size |
| | | W-410 | 6 Hegman grind |
| Rubber Components | Weight reduction, improved throughput | K42HS, S60, S60HS, iM30K, iM16K | When high strength, low density is required |
| SMC | Class A surface finish | S38, S60, S60HS, iM30K, iM16K | Small particle size for improved surface finish |
| | | K1 | Low cost, commonly used |
| Spackling Compounds | Sandability, reduced shrinkage | K15, K20 | When processing requires higher strength |
| | | S15, S22 | Small particle size for smooth texture |
| | | K1 | Low cost, not recommended for spray applications |
| | | K15 | When processing requires higher strength, not recommended for spray applications |
| Spray-Up/Lay-Up | Cost reduction, sandability/machinability, reduced warpage/shrinkage, weight reduction | K20 | When processing requires higher strength, commonly used, not recommended for spray applications |
| | | K25, S32, S35 | Higher strength for spray applications |
| | | S32, S35 | Low cost |
| | | A16, A20, H50, K37, S38, S38HS, S38XHS | For survivability at deep sea pressures |
| Syntactic Foam (Oil and Gas) | Cost reduction, weight reduction | XLD6000 | When low density is required |
| | | K1 | Low cost |
| Tape Joint Compounds | Reduced shrinkage, sandability | K20 | Low cost |
| Tile Grout | Reduced shrinkage, improved flow | K25 | When processing requires higher strength |
| Tooling Board | Less dust during machining, sandability, machinability | K1, K15, S15, S22 | Small particle size |
| Void Filler (Aerospace) | Lightweight | A16, A20, D32 | Lightweight |

Beyond microsphere enhancements... technical support and worldwide service

It can take more than quality products to help you solve complex problems. That's why 3M also provides technical support, a proven global service network, and ongoing R&D to help you meet your ever-evolving needs.

R&D... expanding our capabilities to serve you

With a focus on continuous improvement and innovation, 3M R&D takes you beyond our current microsphere technology – microencapsulation, surface treated products and metal coated products.

Resources

3M™ Microspheres are supported by global sales, technical and customer service resources, with fully-staffed technical service laboratories and an authorized distributor network in the U.S., Europe, Japan, Latin America and Southeast Asia. Users benefit from 3M's broad technology base and continuing attention to product development, performance, safety and environmental issues – including development of innovative solutions such as surface-treated and metal-coated products.

For additional technical information on 3M microspheres in the United States, call 3M Advanced Materials Division, **800-367-8905**. For other 3M global offices, and information on additional 3M products, visit our website at: www.3M.com/microspheres.

Warranty, Limited Remedy, and Disclaimer: Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. User is solely responsible for evaluating the 3M product and determining whether it is fit for a particular purpose and suitable for user's method of application. Unless a different warranty is specifically stated in the applicable product literature or packaging insert, 3M warrants that each 3M product meets the applicable 3M product specification at the time 3M ships the product. 3M MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY IMPLIED WARRANTY OR CONDITION ARISING OUT OF A COURSE OF DEALING, CUSTOM OR USAGE OF TRADE. If the 3M product does not conform to this warranty, then the sole and exclusive remedy is, at 3M's option, replacement of the 3M product or refund of the purchase price.

Limitation of Liability: Except where prohibited by law, 3M will not be liable for any loss or damages arising from the 3M product, whether direct, indirect, special, incidental or consequential, regardless of the legal theory asserted, including warranty, contract, negligence or strict liability.

Technical Information: Technical information, recommendations, and other statements contained in this document or provided by 3M personnel are based on tests or experience that 3M believes are reliable, but the accuracy or completeness of such information is not guaranteed. Such information is intended for persons with knowledge and technical skills sufficient to assess and apply their own informed judgment to the information. No license under any 3M or third party intellectual property rights is granted or implied with this information.
