3M™ Respirators for the Construction Market

3M Innovation
The one thing all contractors agree on is that different jobs require different tools. That’s why they keep several styles of 3M Particulate Respirators on hand.

With three distinct levels of features, 3M makes it easy to choose the most comfortable respirator for the job.

A wide range of feature selections are available to maximize comfort and safety based on personal job intensity, work environment conditions and planned wear time. In addition, 3M patented filters are NIOSH certified to provide at least 95% filtration efficiency against non-oil airborne particles. From quick tasks to heavy-duty projects, reach for 3M particulate respirators and help create a safer and more comfortable work environment.

3M™ Particulate Respirator 8210Plus, N95

Moderate duty and medium duration work.

When sanding and grinding jobs permeate the air with dust, reach for the new 8210Plus Particulate Respirator. This respirator features innovative, soft, braided comfort straps that provide greater levels of comfort. Greater comfort promotes longer wear time and enhanced productivity.

- Adjustable noseclip with foam padding helps provide a secure, custom fit
- Multi-layer construction with a soft inner shell for enhanced comfort
- 3M patented filter media provides at least 95% filtration efficiency against non-oil airborne particles
- Government-approved N95 respirator

⚠️ WARNING! User must read warnings on back cover before using product.
Heavy duty, long wear, high heat and humidity.
Breathe cool and easy even in hot and humid conditions. The 3M™ Cool Flow™ Exhalation Valve creates a comfortable breathing environment by allowing exhaled heat and humidity from your breath to escape. With advanced comfort features, this respirator is also ideal for longer jobs that require extended respirator use.

- Patented one-way Cool Flow exhalation valve reduces moisture buildup inside shell for cool, dry comfort
- Soft, braided comfort straps resist tears and won’t get tangled in hair
- M-noseclip helps create a secure seal and prevents eyewear fogging
- Fully featured, multi-layer construction has a soft inner shell for enhanced comfort
- 3M patented filter media provides at least 95% filtration efficiency against non-oil airborne particles
- Government-approved N95 respirator

Light duty and short duration work.
The 8000 series helps filter out fine airborne particles from light sanding and sweeping and helps create a more comfortable work environment. The unique, lightweight construction helps you stay cool and comfortable, making it the perfect choice for any light duty task.

- 3M patented filter media provides at least 95% filtration efficiency against non-oil airborne particles
- Lightweight, single-layer construction provides enhanced comfort
- Adjustable noseclip reduces eyewear fogging and provides a secure seal
- Government-approved N95 respirator

⚠️ WARNING! User must read warnings on back cover before using product.

### WARNING! Particulate Respirators

These respirators help protect against certain airborne contaminants. **Misuse may result in sickness or death.** For proper use, see *User Instructions*, see supervisor or contact 3M Technical Service at 1-800-243-4630.

**Important**

Before using these respirators, you must determine the following:
1. The type of contaminants for which the respirator is being selected.
2. The concentration level of contaminants.
3. Whether the respirator can be properly fitted on the wearer’s face. All respirator instructions, warnings, and use and time limitations must also be read and understood by the wearer before use.

Before use of these respirators, a written respiratory protection program must be implemented meeting all the requirements of OSHA 29 CFR 1910.134, including training and fit-testing.
