3M™ Organic Vapor Diffusion Monitor
3500/3510 & 3520/3530

Overview/Benefits
• Simple and convenient.
• No batteries, hoses or pumps to operate.
• Easy to use. Just clip the monitor to shirt lapel, collar, or pocket.
• Versatile. 3M monitors can also be used for area monitoring, if sufficient air flow exists.
• Analysis options. 3M monitors can be analyzed in the lab of your choice or returned to a 3M contracted lab for analysis.
• Confidence. Our testing facilities are accredited by the American Industrial Hygiene Association.
• Comfort. 3M monitors are small and lightweight and will not interfere with employee activities.

The 3M™ Diffusion Monitor is a sampling device designed to measure average concentrations of certain contaminants over a measured time interval. It can be used for either personal or area monitoring. As a personal monitor, it is worn near the breathing zone of individuals exposed to potentially hazardous environments. When used as an area monitor, hang it away from walls, corners, table tops, or other regions where the air movement in the room may be limited.

Product Information
3500 and 3510 organic vapor diffusion monitors contain a single charcoal adsorbent pad. The 3500 monitor is designed to be analyzed by the user or by an independent laboratory. The 3510 includes a prepaid analysis for up to three compounds per monitor.

3520 and 3530 organic vapor diffusion monitors contain two charcoal adsorbent pads for increased capacity. The 3520 monitor is designed to be analyzed by the user or by an independent laboratory. The 3530 includes a prepaid analysis for up to three compounds per monitor.

3M Monitor prepaid analysis services will be provided by an American Industrial Hygiene Association (AIHA®) Accredited Laboratory. Confidentiality of customer analysis results will be maintained. The list of the compounds which are included in the prepaid analysis service for the 3510 and 3530 monitors is given in the User Instructions. Up to 3 compounds may be selected from this list for analysis. A written report will be quickly returned to document the results of the analysis.

Meets accuracy of +/- 25% for many organic vapors. Please see 3M Technical Data Bulletins for more information.

Store in an area free of organic vapors.

Shelf life is 18 months from date of manufacture. Expiration date is printed on packaging in MM_YY format.

Sampling times will vary according to contaminant concentrations and environmental conditions such as humidity. Sampling times should be selected for comparison with appropriate exposure limits. For details on appropriate compounds and sampling times, refer to the Organic Vapor Sampling and Analysis Guide.

For more information, please call 3M Technical Service at 1-800-243-4630 or see the User Instructions.
Sampling Instructions

1. Remove the diffusion monitor from the can.

2. Before monitoring, record the following information in your data log and on the enclosed form:
   - 1) monitor serial number,
   - 2) sampling date,
   - 3) employee or area ID,
   - 4) temperature and relative humidity,
   - 5) compounds to be analyzed.

3. Record the date, employee or area ID and sampling start time on the monitor label (Fig. 1).
   **DO NOT REMOVE WHITE FILM AND PLASTIC RING.**

4. Monitor can be used as an area or personal sampler. For personal sampler attach the monitor near employee breathing zone (Fig. 2). When used as an area monitor, hang it away from walls, corners, table tops, or other regions where the air movement in the room may be limited.

5. After sampling period is ended, remove plastic ring and white film from the monitor (Fig. 3).
   **MOVE TO STEP 6 IMMEDIATELY.**

6. **3500/3510:** Snap elution cap (with plugs) onto main monitor body (Fig. 4). Be sure the two port plugs are secured. Record final sampling time on the back of monitor. Monitor is now ready for shipment.

   **3520/3530:** Snap elution cap (with plugs) onto the top of the primary body (Fig. 5). Separate the primary body and secondary body sections. Snap the bottom cup (no plugs) into the bottom of the primary section (Fig. 6). Snap elution cap on the secondary body. Monitor is now ready for shipment.

   **NOTE:** The primary and secondary sections should have the same identification numbers.

7. Return monitor and short plastic straw to can and close with plastic lid provided.

8. **3500 or 3520:** Monitors do not include prepaid analysis; therefore, **DO NOT RETURN TO 3M FOR ANALYSIS.** Please see www.aiha.org for a list of AIHA® accredited laboratories. A detailed analysis procedure is available from 3M.

   **3510 or 3530:** Send monitor plus completed analysis request form to:
   Pace Analytical Services, Inc.
   Industrial Hygiene Division
   1800 Elm St., Suite 1830
   Minneapolis, MN 55414

Good industrial hygiene practice indicates that a blank monitor be included with each set of samples to check for any contamination of the samples. The blank is a monitor which has been handled in the same manner as the sample monitors, but has not been exposed to the atmosphere in the area being monitored.

**NOTE:** Certain compounds (e.g. acetone, methyl ethyl ketone, vinyl acetate, etc.) may show a decreased recovery when sampled in high relative humidity. Refrigerate and/or expedite for analysis to help ensure accurate results.

**Important Notice to User**

The following warranty is made in lieu of all other warranties express or implied, including but not limited to the implied warranties of merchantability and fitness for purpose: 3M Personal Safety Division (3M PSD) products sold will meet the physical standards and properties set forth in the applicable product specification data sheets issued by 3M. 3M’s only obligation under this warranty shall be to replace such quantity of 3M PSD products proved to be defectively manufactured by failing to meet the aforementioned specification data sheets, and to be responsible for any third party personal injuries directly caused by said defects. Except as provided above 3M shall not be liable or responsible for any loss, damage, or liability, direct, indirect, incidental, special or consequential, arising out of the sale, use or misuse, or the inability to use products by the user.

---

**WARNING**

**Do Not Use For:**

- Ammonia, Carbon Monoxide; Ethylene Oxide*; Formaldehyde*; Hydrogen Sulfide; Isocyanates: Methane; Ethane; Propane; Methyl Alcohol (Methanol); Methyl Chloride; Methyl, Dimethyl, Trimethyl Amines; Organic Solids; Sulfur Dioxide
- Reactive or polar compounds such as amines, phenols, aldehydes, and low molecular weight alcohols
- Extremely low concentrations within a sampling period of less than 8 hours

*Ethylene Oxide can be monitored using 3M™ Ethylene Oxide Monitor 3550/3551.
*Formaldehyde can be monitored using 3M™ Formaldehyde Monitor 3720/3721.

For product use instructions and limitations, see User Instructions Guide.
