An advanced hydrocolloid dressing for moderately exuding wounds

Indications for use
- Wound debridement
- Pressure ulcers
- Moderately exuding wounds
- Leg ulcers

Assess the wound and select a suitable size (so that 2.5cm of dressing, including the adhesive border, extends beyond the wound edge). Holding the dressing by the tabs marked “1”, remove the protective paper layer.

Being careful to avoid stretching, apply the dressing over the wound. Smooth the dressing and the film border and edges into place. The oval shape of Tegaderm Hydrocolloid and Tegaderm Hydrocolloid Thin dressing conforms easily to contoured areas such as heels and elbows.

Remove the plastic carrier from the top of the dressing by peeling the sections marked “2” in the direction of the arrows. Smooth the dressing edges down as you remove the carriers.

Gently tear off the end tab marked “1”. Avoid lifting the edges of the dressing when removing the tabs. Reinforce the dressing adhesion by applying gentle finger pressure over the dressing.

Reasons for using Tegaderm Hydrocolloid Dressing
- **Tegaderm Film border provides:**
  - extended wear time for up to 7 days
  - a waterproof backing and protection from bacteria and viruses
- **Efficiently absorbs exudate**
- **Low allergenicity product** – does not contain gelatin, pectin or tackifiers such as colophony or its derivatives

GF323
A range of advanced hydrocolloid dressings for low to moderately exuding wounds

3M™ Tegaderm™ Hydrocolloid Sacral
3M™ Tegaderm™ Hydrocolloid
3M™ Tegaderm™ Hydrocolloid Thin

SIMPLE. DEPENDABLE. TRUSTED.
Removal guidance

• When the colour of the dressing turns lighter as it absorbs the exudate and reaches 0.5cm from the border edge, the dressing must be changed.

Reasons for using **Tegaderm Hydrocolloid Sacral Dressing**

• Covers sacral and ischial area simultaneously
• **Tegaderm Film border provides:**
  • extended wear time for up to 7 days¹
  • reduced risk of “rucking up” preventing contamination
  • a waterproof backing and protection from bacteria and viruses
  • simple delivery system
• **Does not contain** – gelatin, pectin or tackifiers such as colophony or its derivatives
The 3M™ Tegaderm™ Hydrocolloid Dressings Range

Tegaderm Hydrocolloid and Tegaderm Hydrocolloid Thin

**Nose and Cheeks**
- Use Tegaderm Hydrocolloid Thin Dressing to size to protect skin from oxygen masks and nasogastric tubes.

**Ears**
- Cut Tegaderm Hydrocolloid Thin Dressing 90022 (10x10cm) into strips and place at top of ear to protect skin from elastic bands from oxygen masks.

**Hips**
- Use Tegaderm Hydrocolloid Sacral Dressing 90007 (16.1x17.1cm) to treat hip wounds such as pressure ulcers and post surgical sites.
- Use Tegaderm Hydrocolloid Dressing 90003 (13x15cm oval) to treat hip wounds.

**Sacral**
- Use Tegaderm Hydrocolloid Sacral Dressing 90007 (16.1x17.1cm) to treat pressure ulcers simultaneously on sacrum and ischial areas.
- Use Tegaderm Hydrocolloid Sacral Dressing 90007 (16.1x17.1cm) to protect vulnerable skin in these areas.
- Use 3M™ Cavilon™ Durable Barrier Cream on intact or irritated skin to prevent breakdown caused by incontinence.
- Use 3M™ Cavilon™ No Sting Barrier Film to protect against peri-wound maceration of pressure ulcers.

**Bottom (Ischium)**
- Tegaderm Hydrocolloid Dressings can be used over ulcerated ischial areas.
- Use Tegaderm Hydrocolloid Thin Dressing 90022 (10x10cm) into an hour-glass shape to fit around digits.

**Chest and Shoulders**
- Use Tegaderm Hydrocolloid Dressing 90002 (10x10cm square) and 90005 (15x15cm square) for chest and shoulder blade areas.
- Use 3M™ Cavilon™ Durable Barrier Cream on intact or irritated skin to prevent breakdown caused by incontinence.
- Use 3M™ Cavilon™ No Sting Barrier Film to protect against peri-wound maceration of pressure ulcers.

**Feet**
- Use Tegaderm Hydrocolloid Thin Dressing to protect skin at the first signs of breakdown.
- Tegaderm Hydrocolloid Thin Dressings are conformable and low profile to enable normal footwear to be worn.

**Hands and Fingers**
- Use Tegaderm Hydrocolloid Thin Dressing on the backs of hands.
- Cut Tegaderm Hydrocolloid Thin Dressing 90022 (10x10cm) into an hour-glass shape to fit around digits.

**Lower Limbs**
- Use both Tegaderm Hydrocolloid and Tegaderm Hydrocolloid Thin Dressings for skin tears or pre-tibial lacerations.
- Range of sizes available to treat different shapes and types of wounds.

**TIP:** Warm dressing in hands to help mould dressing to body contours
