3M™ Steri-Strip™ S
Surgical Skin Closure

Poster of Available Sizes

3M™ Steri-Strip™ S Surgical Skin Closure is a non-invasive, adhesive-based wound closure device designed to close low-tension surgical incisions or lacerations painlessly and without the use of needles.

Important Features and Benefits:
- Fast application
- Good cosmetic results
- Precise wound edge alignment and approximation
- Less infection potential than sutures and staple use
- Helps limit tissue trauma and patient discomfort
- Adjunct to suture closures for higher tension wounds or as reinforcement for wounds after early suture or staple removal
- Devices can be combined to achieve the length needed or to close a curved wound
