Any place. Any class.

It’s the one that can do it all.
Designed to be versatile.

If you’re still using one composite for strong posterior fillings, and another composite for highly esthetic anterior work—then you’re about to learn how to simplify your procedures, your inventory and your practice.

With over 400 million1 restorations globally, Filtek™ Supreme Ultra Universal Restorative is the ONE composite that can do it ALL.

It’s beautiful enough for anterior restorations, but also strong enough for posterior restorations. Filtek Supreme Ultra restorative is the one to choose for all of your direct restorative needs.

“I’ve been using Filtek for years and have found it to be one of the few products that are great for both anterior and posterior use. It polishes great and has very good shade stability.” Testimonial, Cybertuth

3 reasons why Filtek™ is the #1 selling nanocomposite in the U.S.2

Unsurpassed Esthetics
- Excellent polish retention
- Wide range of shades and opacities
- Natural-looking fluorescence

Simple to Use
- Exceptional handling
- Capsules and syringes are color-coded by opacity
- Bold, easy-to-read labels

Performance
- Excellent wear resistance
- Radiopaque
- Outstanding strength for anterior and posterior use

1. Filtek™ Supreme Universal Restorative line
2. Based on U.S. sales.
The composite that can do it all.

Any place: anterior or posterior. Any class.

Any esthetic solution.

Single-shade restorations
If you prefer the simplicity of a single-shade technique, Filtek Supreme Ultra Universal Restorative offers 17 natural-looking Body shades that match the VITA® classical Shade Guide. Research shows that clinicians tend to select 8 shades for the majority of their restorative needs—in all classes. A simplified selection means a simpler inventory too.

Multi-shade restorations
If you prefer taking esthetics to a higher level using a dual-shade or multi-shade layering technique, then you’ll enjoy having 36 beautiful shades and 4 opacities to choose from.

Syringes and capsule bottle labels are color-coded by opacity and have bold lettering for fast, accurate selection.
Designed to be beautiful.

Remarkable polish

The initial gloss of most restoratives can be very impressive. But you want to know your restoration is going to retain its natural gloss for years. Filtek™ Supreme Ultra Universal Restorative is easier to polish … and tests prove the polish retention is better than other composites, and is even better than a microfill.

A difference you can see.

Polish you can see. Side-by-side photos compare the polish retention of leading restoratives to that of Filtek™ Supreme Ultra Universal Restorative after 6,000 cycles of simulated toothbrushing.

Anterior

3M ESPE nanofiller technology:

Unsurpassed polish retention for superb esthetics.

The significant distinction between Filtek Supreme Ultra restorative and micro- and nanohybrids is that 3M ESPE’s nanoparticles are uniquely FORMED in the nano size range and are not the result of a grinding process. Some nanoparticles of Filtek Supreme Ultra restorative are fused into secondary structures called NANOCLUSTERS.

The nanoclusters shear at a rate similar to the wear of the surrounding resin matrix during abrasion, such as toothbrush abrasion. That’s why Filtek Supreme Ultra restorative maintains a smooth surface gloss, giving restorations unsurpassed polish retention for superb esthetics.
Designed to be strong.

Excellent flexural strength

In a test comparing leading dental composites, the flexural strength of Filtek™ Supreme Ultra Universal Restorative proved better than that of EsthetX HD, Herculite Ultra and Tetric EvoCeram, and comparable to other composites tested.

Better wear resistance

The lower the wear rate of a composite material, the better its wear resistance. In an in vitro 3-body wear test, Filtek™ Supreme Ultra Universal Restorative had the lowest wear rate of all leading composites tested.

Excellent strength and wear resistance

Filtek Supreme Ultra Universal Restorative nanoclusters have a similar size range as fillers found in the hybrid composites, therefore they provide for high filler loading. This results in excellent physical properties and wear resistance, making it ideal for posterior restorations.

Our versatile flowable is a perfect companion to our leading nanocomposite.

Flowables provide an easy solution for a wide range of cases.

While efficiency is key, you need to be confident your restorative will perform as expected—and handle beautifully using your technique. That's why dentists are choosing Filtek™ Supreme Ultra Flowable Restorative. Its enhanced properties make it ideal for multiple indications.

- Using it as a liner/base, you'll enjoy excellent handling, cavity adaptation and shade selection.
- As a filling material, you'll find it esthetic, easy to use and polish.

Our universal and flowable restoratives are designed to work together.

The same unique nanotechnology used by Filtek™ Supreme Ultra Universal Restorative gives our flowable advantages such as:

- Excellent esthetics (available in 12 shades formulated to match Filtek Supreme Ultra Universal Restorative)
- Unsurpassed polish retention*
- Low wear

In fact, a 2-year clinical study involving Class I restorations¹ showed that the performance of Filtek Supreme Ultra Flowable Restorative was equal to that of Filtek Supreme Ultra Universal Restorative for all criteria measured—including wear resistance.

2-Year Study¹ shows our universal and flowable composites performed equally on all criteria measured:

- Wear resistance
- Anatomic form
- Color match
- Marginal integrity
- Marginal discoloration
- Secondary caries
- Sensitivity

†Small, non stress bearing occlusal restorations
### Filtek™ Supreme Ultra Universal Restorative

#### Single Shade Introductory Kit—Capsule
- **Kit includes:** 2 – 4g syringes: 1 each of Body shades A1, A2, A3, A4, A6, B1, B2, C2, D2, White, Extra White
- **1 Shade Selector Wheel; Technique Guide; Instructions for Use**

#### Single Shade Introductory Kit—Syringe
- **Kit includes:** 2 – 4g syringes: 1 each of Body shades A1, A2, A3, A4, A6, B1, B2, C2, D2, White, Extra White
- **Instructions for Use**

#### Dual Shade Introductory Kit—Capsule
- **Kit includes:** 10 each of Dentin shades A1, A2, A3, A4, A6, B3, B5, C3, D2, D3, White, Extra White
- **1 Shade Selector Wheel; Technique Guide; Instructions for Use**

#### Dual Shade Introductory Kit—Syringe
- **Kit includes:** 4 – 4g syringes: 1 each of Dentin shades A1, A2, A3, A4, A6, B3, B5, C3, D2, D3, White, Extra White
- **Instructions for Use**

### Filtek™ Supreme Ultra Flowable Restorative

#### REFINISH SHADES SYRINGE CAPSULE
- **Shade Refills**
- **Include 1 – 4g syringe**
- **Body Shade Refills**
- **Include 10 – 0.2g capsules; Body Shade Refills include 20 – 0.2g capsules; Instructions for Use.**

#### Capsule Refills
- **Dentin Shades**
- **Enamel Shades**
- **Translucent Shades**
