MDI
Mini Dental Implants

A simple, proven system for building your practice.

3M ESPE
Why Mini Dental Implants?

So you can treat the patient who is compromised by bone, money or time.

✔ Bone
Mini Dental Implants require a minimum of 4.8mm bone width. Conventional implants require more.

✔ Money
Mini Dental Implants are an affordable solution for the patient that is financially compromised.

✔ Time
Most often mini dental implants can be placed during a two hour appointment where as conventional implants can take up to 6 months to be implanted.

✔ Proof
Osseointegration Study
Human histological study proves the blasted surface of the MDI implant osseointegrates comparably to conventional implants. For a full clinical literature review or a listing of clinical abstracts, please contact the 3M ESPE customer care center at 1-800-634-2249 ext 2.

✔ Practice Builder
Placing mini dental implants will allow you to treat new and existing patients and open up a new revenue stream for your practice.

Why MDI from 3M ESPE?

✔ Simple Procedure
You can do this. A one-day MDI certification course gets you going.

✔ Market Leading System
A market leader in small diameter implants and the go-to company for training/certification.

✔ Instant Patient Gratification
The 2-hour, immediate load MDI procedure can restore a denture patient’s quality of life immediately.

✔ Long-Term Denture Stabilization
MDI implants are indicated for long-term use. Not all small-diameter implants are.

✔ Minimally Invasive
The patented MDI insertion protocol is often completed without a flap or graft.

✔ We Are Here for You
3M ESPE empowers you with a dedicated support staff to guide you and deliver the tools you need to market mini dental implants to your community.

3M ESPE MDI Mini Dental Implants are changing patients’ lives.

In our 1-day exclusive workshop, you can master the basics and start immediately to build your practice with this faster, widely affordable procedure that has denture wearers excited.

Learn from Top MDI Experts
Designed for general dentists and their teams.

This workshop class size is limited to enable one-on-one time with the course instructor. Learn MDI surgical and prosthetic protocols through case presentations and hands-on practice.

MDI Certification Course Objective
To help dentists master the basics of minimally invasive implantology, including:

- Indications for MDI denture treatment
- Successful case selection and planning strategies
- MDI placement and protocol for stabilization of lower dentures
- Nuances of maxillary MDI denture cases
- MDI restorative protocols
- Valuable practice-building strategies
