**Description:**

The product is a looped-pile, carpet-type entryway matting. 3M™ Nomad™ Carpet Matting 8850 features a unique tufted construction with random pattern design utilizing two different size fibres. Areas of large diameter polypropylene fibres combine with areas of small diameter nylon fibres to maximize dirt removal, water pick up and holding capacity. The matting has a solid vinyl backing and edging on all four sides.

**Intended Use:**

For use as entryway matting where snow, water and/or dirt tracking is a problem.

**Standard Sizes:**

Widths: 0.9m, 1.2m and 1.8m (3 feet, 4 feet or 6 feet)

**Colours:**

Ebony, Slate (gray), Dove (brown), Checkers (gray/red mix), Blueberry, Burgundy, Green

**Requirements:**

The product is made of two different sizes of fibres featuring a unique tufted construction and random pattern design; small diameter nylon fibres combined with large diameter polypropylene fibres to maximize performance. The product has a black solid vinyl backing and edging on four sides.

**Property (Typical Values)**

1. Thickness (ASTM D418-68):
   - Minimum 8.1mm (0.32 inches)
2. Weight (ASTM D-418):
   - Minimum: 3.5 kg/m² (6.5 lb/yd²)
3. Flammability (DOC FF 1-70 - Pill Test):
   - Passes
4. Electrostatic Propensity (AATCC 134, Neolite soles):
   - Step: -1.88 KV
   - Scuff: -1.38 KV

**Packaging and Marking:**

**Packaging:**

Pre-Cut Mats – one per case except 0.6m x 0.9m (2 ft. x 3 ft. - 6 per case)

**Marking:**

Each carton shall be marked with product name, size, colour and manufacturer’s trade name.

**Installation, Seaming and Edging:**

**Custom Cutting:**

3M™ Nomad™ Carpet Matting 8850 can be easily custom cut without edges fraying. Length and width dimensions may change during use. Wall-to-wall installations are not recommended.

**Tools needed:**

- Utility knife
- Straight edge 1-1.3m (3-4 feet) long

- If matting is to be cut to close specifications, be certain it is relaxed and not stretched. Unroll matting and allow to lie undisturbed for 24 hours at room temperature. Avoid stretching or pulling on mat when seaming.
- Use pieces from the same roll to assure that colour, shade and texture are the same.
- Maximum recommended mat size is 7.2 sq. meters (80 sq. ft.).

**Seaming:**

3M™ Nomad™ Carpet Matting 8850 can be seamed together to make mats wider or longer than standard sizes.

**Materials needed:**

- 3M™ Matting Seaming Tape (kit or roll)
- 3M™ Matting Adhesive (one 3-ounce tube of adhesive will seam 4.5 meters [15 linear feet] of matting)

Before seaming, be certain that matting is relaxed and not stretched. Unroll matting and allow to lie undisturbed for 24 hours at room temperature. Avoid stretching or pulling on mat when seaming.

- Use pieces from the same roll to assure that colour, shade and texture are the same.
- Maximum recommended mat size is 7.2 sq. meters (80 sq. ft.).

You may want to use smaller mats for ease of handling and maintenance.

1. Place pieces of matting to be seamed side by side on a clean surface.
2. Unroll 3M™ Matting Seaming Tape between the two pieces of matting to be joined. Cut tape to length.
3. Position the pieces of matting on the seaming tape so that each piece’s edge covers half the width of the tape. Be sure the pieces of matting touch at the tape center but do not overlap or buckle.
4. Fold back the edge of one piece of the matting along the full length of the seam.
5. When applying adhesive work rapidly. Adhesive may cause wrinkling of the seaming tape if the matting is not joined within 5 minutes of applying the adhesive. Apply adhesive in a continuous "zig-zag" pattern staying 6mm (1/4") from the outside edge of the exposed half of the seaming tape.
6. Return the folded edge of the matting to its original position and apply moderate pressure to bond the adhesive.
7. Fold back the second piece of matting along the full seam length.
8. Apply two additional beads of adhesive, the first along joint of seaming tape and the first piece of matting, and the second in a wavy pattern ¼ inch (6mm) from the outside edge of the exposed half of the seaming tape.

9. Return the folded back edge of the matting back to its original position and press firmly. At the same time, gently push both pieces of matting together to eliminate any gaps.

10. Place a weight, such as a board, along the full length of the seam to maintain pressure on the bond. Allow to dry undisturbed for at least eight hours before placing it into service.

**Applying Matting Edging:**

Edging can be easily applied to 3M™ Nomad™ Carpet Matting 8850 to form a tapered edge.

**Tools and Materials Needed:**

- Utility knife
- Straight edge, 1-1.3 meters (3-4 feet long)
- 3M Matting Edging – Medium Profile

3M Matting Adhesive (one 3-ounce tube of adhesive will apply approximately 15 linear feet (4.5 meters) of edging)

- Before applying edging ensure that matting and edging are relaxed and not stretched. Unroll matting and edging and allow to lie undisturbed for 24 hours at room temperature. Do not stretch or pull on matting when applying edging.
- Apply edging to opposite side of matting where most people will walk. Recommended maximum edge length is 12 feet (3.6 meters).

1. Arrange mat on floor so that sides to be edged are straight. Trim edges with a utility knife (not scissors) and a straight edge if necessary (see Custom Cutting).
2. Cut a piece of edging the same length as the edge of mat.
3. Place edging flat on the floor, grooved side up.
4. Apply two beads of adhesive liberally to the top of edging.
5. Place edge of mat on top of edging groove containing adhesive. Gently work mat snugly into the corner of edging groove to ensure a good fit.
6. Place a weight, such as a board, along the full length of edging to maintain pressure on the bond. Allow to dry undisturbed for at least 8 hours before placing it into service.

**Cleaning and Maintenance**

**Daily Maintenance:**

- Vacuum daily.
- Use an upright beater-brush dry vacuum adjusted to its most powerful setting. Move nozzle slowly over mat to allow time for dirt to be picked up.
- In heavier traffic areas or at pivot points, rotate matting end for end when repositioning.

**Important:** Keeping the backing of the mat clean is critical in minimizing the mat “walking”. Floor under mat must also be kept clean (swept and/or damp mopped underneath mat).

**Weekly Maintenance:**

1. Remove matting from service.
2. Turn matting over and run beater bar, dry vacuum on back side of matting.
3. Pick up matting.
4. Clean up dirt/debris from floor (sweep, vacuum, damp mop, etc.)
5. Place matting back in service and vacuum top surface of matting.

**Wet Conditions for Mats and Rolls:**

1. Use an extractor or wet vacuum to remove as much water as possible from mat.
2. Allow mat to dry. Hang up if necessary. Use of fan or blower will reduce dry time.

**Restorative Maintenance:**

Frequency of restorative maintenance will depend on the amount of traffic and soil in the area of application.

**Rotary Shampoo and Extract**

1. Wet matting with diluted solution of Scotchgard™ Pretreatment Cleaner Concentrate or Scotchgard™ Extraction Cleaner Concentrate.
2. Loosen dirt using a rotary brush.
3. Extract at least two times. (If heavily soiled, repeating this procedure may be required.)
4. Let mat dry. OR

**High Pressure Washer**

Use high pressure washer (i.e., at self-service car wash).

1. Hang mat up.
2. Wash mat thoroughly.
3. Rinse mat thoroughly.
4. Let mat dry.
