

3M™ Scotchgard™ Graphic and Surface Protection Film 8995-124

Description

3M™ Scotchgard™ Graphic and Surface Protection Film 8995-124 is a matte, graffiti resistant, durable overlamine . It can be used with a variety of 3M graphic films that will be applied to flat surfaces without rivets.

Advantages

- Provides graffiti-resistant protection
- Superior resistance against harsh solvents
- Abrasion resistant
- Easy to clean
- Low surface gloss eliminates glare

Applications and End Uses

- Protection of interior graphics and signs
- Protection of interior substrates and surfaces

Limitations of End Uses

Any other application is NOT warranted by 3M or covered by the worldwide 3M MCS warranty unless 3M gives its prior written approval for the application.

Specifically, 3M cannot warrant this product for the following applications:

- Exterior applications
- Application on corrugated and irregular surfaces with and without rivets.
- Applications subject to excessive vandalism or product abuse such as cutting or gouging resulting in damage to the substrate
- Application onto Non-3M films
- Graphics made for automotive Original Equipment Manufacturers (OEM); contact 3M Automotive Division for alternatives.

Compatible Products

- 3M™ Graphic Marking Films
(for details and compatibility please refer to the corresponding Product Bulletin)
- Selected 3M application tapes

Product Line

This product is available in the following dimensions.

- 1.219m x 50m

Please contact 3M sales office for stock available and lead times.

Characteristics

This information is subject to change. Be sure this is the most current Product Bulletin.

Property	Description
Film (8995-124)	0.023 mm PET
Adhesive type	Permanent, clear pressure sensitive
Liner	120g/m ² kraft paper
Application surface	Flat
Application temperature range	10° to 38° C
Use temperature range	-55°C to + 90°C
Surface Gloss @60°	35 G.U. +/-10 G.U

Effective Performance Life & Warranty

Only a Scotchprint® Graphics Authorised Manufacturer or 3M™ MCS™ Qualified Manufacturer can produce 3M™ MCS™ Warranted Graphics. The warranty period is based on field experience and exposure tests. When the graphics are processed and used according to the 3M recommendations, they should have the performance life shown in the table below. The actual performance depends on the:

- Use with compatible products
- Correct combination of films and inks
- Selection and preparation of the substrates
- Application methods employed
- Cleaning and maintenance methods employed
- Exposure conditions in service

Warranted Durability

Product	Interior
8995-124	6 years

Note: Maximum durability will not exceed that of the film or substrate on which this is laminated.

Commercial Graphics Division products are not tested against automotive manufacturer's specifications and are, therefore, not warranted for use in fabricating graphics for automotive OEM's.

Fabrication

This bulletin does not contain detailed printing, processing or application procedures for the subject products. The appropriate Instruction Bulletin(s) may be obtained by contacting your 3M sales representative or 3M Technical Service.

Printed graphics must be dry prior to lamination.

Roll Lamination

Scotchgard™ 8995 -124 film can be roll laminated onto other films or substrates using the standard laminator set-up.

Premasking / Prespacing

Conditions	3M Brand Application Tapes
General Premasking	SCPM-19
General Prespacing	SCPS-100

Shelf Life, Shipping and Storage

The shelf life of the film is 2 years and should be applied within 2 years of the receipt of film if unprocessed. Processed film should be applied within 1 year of processing and within 2 years of receipt of the film.

Film, sheeting and markings must be stored in a clean area, free from excessive moisture and direct sunlight, with ambient temperatures below 38°C.
