Summary of advantages

• Up to 50% stronger than the leading bulk fill flowable¹

• Nearly twice the wear resistance of leading bulk fill flowables²

• Choice of deliveries: easy-to-use capsules or syringes

• 4 Shades: A1, A2, A3, Universal

There's a growing trend for faster, easier procedures. As the trusted leader in dental restoratives, we've succeeded in not only improving the procedure, but the results as well—with Filtek™ Bulk Fill Flowable Restorative.

It's easy to dispense and apply, and offers important features that include:

• A 4 mm depth of cure—reducing the need for incremental layering and risk of contamination.

• Lower stress that allows bulk placement and helps reduce the risk of post-operative sensitivity.

• Good marginal adaptation.

• A flowable viscosity for easier adaptation to the cavosurface—which requires less instrument manipulation.

For an easier procedure without compromise, choose Filtek Bulk Fill Flowable Restorative.

1. Compared to SureFil SDR Flow.
Choose Filtek™ Bulk Fill Flowable Restorative for fast and simple posterior restorations.

1. Prepare the tooth.
2. Dispense up to 4 mm of Filtek™ Bulk Fill Flowable Restorative into the prepared cavity and cure.
3. Place a 2 mm (minimum) capping layer of an esthetic composite, such as a Filtek™ universal restorative, and cure.
