

July 10, 2018

Dear Dental Professional:

This letter provides information on the safety of 3M™ ESPE™ Vanish™ 5% Sodium Fluoride White Varnish and may be used to address questions you or your patients may have regarding the product.

Like all 3M Oral Care products, 3M ESPE Vanish 5% Sodium Fluoride White Varnish was thoroughly assessed for biocompatibility and was found to be safe for its intended use. The assessment was performed in accordance with current national and international standards for medical device biocompatibility by a board-certified toxicologist and was submitted and reviewed as part of our global registration process.

In accordance with biocompatibility standards, our assessment considers the safety information for components, along with an extensive set of test data on Vanish Varnish. Factors such as the concentration of components and product usage are also included in the assessment. The results of this comprehensive assessment demonstrate the safety of the product when used as intended.

In addition, the conclusions of 3M Oral Care's safety assessment are supported by the highly favorable clinical usage history of Vanish Varnish in millions of patients.

Should you or your patients have additional questions regarding the safety of this or any other 3M Oral Care product, please feel free to contact our Customer Care Center at 1-800-634-2249.

Thank you for your interest in 3M Oral Care products.

Best regards,
