3M [OH&ESD]

3M's 6700DIN is a 6000 series full facepiece respirator (small) with a single DIN thread port on the front of the facepiece. The lightweight breathing apparatus can be reused with appropriate filter changes. Several filters can be used with the 6700DIN, all of which are NIOSH-approved against a variety of gases, vapors and particulate hazards. The 6700DIN also features a large, hard-coated, wide-view lens and easy-to-adjust head straps for user comfort.
