# ENSURING THAT YOUR SECURE DOCUMENTS ARE TRUSTED WORLDWIDE.

More than 30 years of experience in producing and protecting the world's most secure documents have been applied to the development of the 3M™ Secure ID Card.

Proprietary 3M technologies help ensure that your documents are not only protected against counterfeiting, but that attempts at alteration and tampering are easy to detect. In short, we help ensure that your secure documents are trusted worldwide.

## Customized solutions to solve your problems.

We recognize that technologies aren't solutions unless they solve your specific problems. So we apply our years of experience with materials science to develop security cards that are customized to solve your unique challenges.

Whether your challenge is defeating sophisticated counterfeiters or ensuring that attempts at alteration are detected quickly and easily, we can provide customized materials to meet your specific security needs.

## Durable. Secure. Multifunctional.

3M Secure ID Cards are attractive, extremely durable and highly secure cards whose appearance and functionality can be tailored to your exact application needs.

Our unique fusion process encapsulates photo images and security features inside two layers of special material. As a result, counterfeiters simply can't get at the information to change it without causing obvious damage to the card.

To further enhance security, the 3M Secure ID Card accommodates proximity card technologies, as well as machine-readable magnetic strips and bar codes.

## Everything you want in your ID Card.

To prevent counterfeiting, alteration, duplication and simulation, three totally different security features are sealed within the 3M Secure ID Card's extremely durable composition.

First, a quick glance at the card in normal, ambient light shows an overt security image—a pattern embedded within the card that changes in intensity when you tilt the card. Viewed under focused light, the security image appears bright and retroreflective against the darker background.

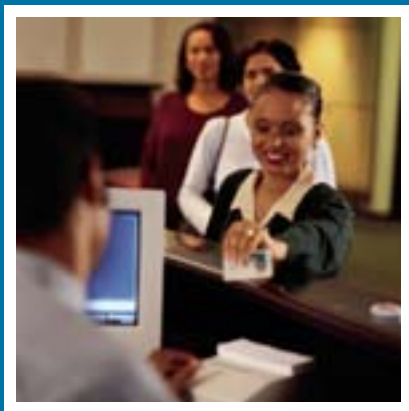

Second, security patterns produced by ultraviolet ink are also embedded in the card. Visible only when viewed with an ultraviolet black light, they cover the entire card.

Third, the unique lenticular surface provides an unmistakable silky feel that can help inspectors verify authenticity by touch alone.

# 3M SECURE ID CARD SOLUTIONS

## EXPERIENCE PAYS.

3M brings over 30 years of experience, a global presence, technical innovation and a strong customer focus to the secure document marketplace. Our solutions cover a broad spectrum of enhanced travel and border security, including document issuance and border management.

## LOCAL SERVICE. GLOBAL SUPPORT.

Serving customers in more than 200 countries around the world, 3M's 67,000 employees use their expertise, technologies and global experience to provide solutions to major markets, including safety, security and protection services.

With operations in over 60 countries, 3M is uniquely positioned to serve you locally, while supporting you with the power of a global, multibillion-dollar organization.

## TRUST AND INTEGRITY.

3M's world-class reputation for quality products and services has been built on more than 100 years of innovation. By listening to our customers and developing long-term relationships, we have established a history of living up to our customers' expectations. As a result, 3M is one of the most admired and emulated companies in the world.

Put 3M's expertise and experience to work for you. Call to find out how you can secure your issuance systems and protect your documents—worldwide.
