3M

A more interactive library...

More children discovering new authors... more students exploring new subjects... more adults developing new interests.
That's what the new V-Series SelfCheck system can do for you. An innovation in productivity that frees library staff to make a difference.

The next generation from 3M

At 3M, we're always listening and we have learnt that today's libraries need self-service that's easier, faster and more versatile.

The V-Series SelfCheck system is the answer. An intuitive system with a sharp contemporary look and a dynamic intelligent design. By freeing you to spend more time with customers, the V-Series will take your library to the next level of productivity and service. A system so intuitive your readers will be using it in no time.

- ✓ More customer privacy
- ✓ Faster issue and return
- ✓ Highest level of security
- ✓ Increased labour service
- ✓ Fewer repetitive tasks

All this comes from a company you can trust:
3M - the inventors of self-checkout technology for libraries.

Value your readers will appreciate

The distinctive V design ensures the proper placement of books, magazines and other items. Combine that with an easy-to-use touch screen, step-by-step instructions and first time success is virtually assured.

It accommodates a wide range of barcode placements, so you never have to worry about re-barcoding your items. Every detail is designed for ease, right down to changing the receipt rolls. You can administrate the V-Series from any library PC with Web access. From style and language options to product and software features, V-Series variety is second to none.

The benefit? Ease of use for your readers, increasing levels of self-service.

Very strong security you can trust.

Featuring an intelligent V-coil design, the V-Series SelfCheck system makes false alarms virtually unheard of. Amongst many security features the system prevents readers from substituting items during checkout.

The benefit? Reduced book loss and peace of mind.

Versatility means more choice.

The V-Series is designed to safely process books, magazines, videos, CDs, and DVDs. Model V1 combines self-service with 3M™ Tattle-Tape™ Strips. Model V2 adds the option of multiple book detection, preventing customers from checking out more than one book under a single barcode. And for all of the above plus the option of RFID technology, there's the Model V3.

The benefit? More flexibility and choice.

Variety gives you more style

The V-Series SelfCheck system can be installed in your library's own furniture or in a 3M supplied free-standing cabinet which is available in a choice of forty colour combinations to complement your libraries interior.

The benefit? Its stylish appearance invites your customers to use it and reduce queues at the circulation desk.

3M™ SelfCheck™ System V-Series

Features

- ✓ **Incredibly easy to use, the distinctive V design makes the proper placement of books, magazines and other items more intuitive.**
- ✓ **The barcode scanner is designed to handle almost any barcode location and orientation. Visible scan line helps readers orient barcodes correctly.**
- ✓ **The embedded printer uses standard size rolls of thermal paper. Changing the paper takes less than 10 seconds.**
- ✓ **Free standing cabinet comes in your choice of 40 colour combinations to fit the look of your library.**
- ✓ **Touch screen for intuitive use.**

Satisfaction Guaranteed

What system is right for you? It all depends on what you need. Whatever you choose, 3M offers a money back guarantee.*

* Terms and conditions available upon request.
