

Track and Locate Assets Confidently

3M™ RFID Tracking System Software

Imagine being able to track and monitor valuable assets in one place. It's possible with the latest release of the 3M™ RFID Tracking System. This intuitive, easy-to-use system can be integrated seamlessly into your current management software, or installed as a stand-alone system.

Because knowing asset locations is critical for increased productivity and deadlines, the RFID tracking software lets you effortlessly track history, location, program tags, import and export information with the 3M™ Handheld Tracker—and much more. It's reliability and durability can help you manage valuable assets with confidence and ease.

Find Assets from Virtually Any Location

Wherever you are, you can find the the asset you're searching for. For instance, valuable files are tracked in archives, offices and multiple-building locations. 3M's revolutionary system allows users to monitor and source histories and locations from any network computer. The end result? Significant gains in the utilization of valuable resources and operational efficiencies in quickly locating files and other assets, not to mention the replacement cost, of which some, are simply irreplaceable.

- Helps increase productivity
- Easy to use
- Can be integrated into current systems, or installed separately
- Monitor and find files from networked computers
- Helps save money in time spent searching for files and assets

WEB LOCATOR SCREEN EXAMPLE

WEB LOCATOR ALERT PAGE

Item ID	Item Group	Last Detected Activity	Last Detected Location	Days without Activity
2216	General	Checkout - Drive Desk	PHS Office	52
4527	Tool Suite	Check In	Drive Desk	46

WEB REPORTER — ACTIVITY REPORT

Features:

Web-based Locator

- Configurable search criteria
- Allows staff members to locate assets from any computer with a browser
- Provides configurable, real-time alerting features
 - Email notification when item detected
 - Ability to subscribe, view and manage alerts
- Helps save time
- Enhances resource utilization
- Enables wider system visibility and management

Web-based Reporting

- User defined reporting criteria
- Supports exporting reports in multiple formats (html, .pdf, excel, word)
- Provides historical information
- Specific reports available immediately:
 - Items checked in and out by location
 - Items without any check-in or check-out activity

Benefits:

Provides visibility

- Less searching for lost or misplaced assets

Promotes efficiency

- Helps optimize chain of custody workflow

Deploys easily

- Seamless integration into existing systems and networks

Secures sensitive records

- Helps reduce the risk of compromising confidential information

Tracks irreplaceable files

- Data can be monitored from multiple locations

Helps ensure compliance

- Simplifies check-in and check-out to help safeguard information
- Electronically documents chain of custody information

Software Features Overview

Windows Vista® Operating System compatibility

ISO standard RFID Tag compatibility
