DIRECTIONS FOR USING PREPRINTED UPS RETURN LABEL

This service is provided at no cost to the customer/distributor providing defective lens to 3M.

Failure to return lens **promptly** after receiving the replacement will result in customer/distributor being assessed a charge for the lens (up to \$394.00), and the inability to participate in this part of the program. In these situations all lenses would have to be returned to 3M for evaluation prior to customer/distributor receiving a replacement.

Please follow the directions below:

(1) Place defective lens into the box that you just received from 3M. Ensure that the lens is packed securely and won't be damaged during shipment. Failure to adequately pack lens could result in the lens being damaged. If lens becomes damaged the customer/distributor will receive a billing for the damaged lens. *(If applicable these charges would be up to \$394.00).*

(2) Place enclosed UPS Return Label on the box being returned to 3M and place with your daily UPS shipments. If you don't have a normal scheduled UPS daily pickup. You will have to contact UPS to schedule a pickup or deliver box to a UPS pickup site for shipment (<http://www.ups.com> or 1-800-742-5877).
