PRODUCT CHANGE NOTICE
3M™ Respirator Cleaning Wipe 504

3M has recently made changes to the packaging and formulation of the 3M™ Respirator Cleaning Wipe 504. The formulation change was necessary to meet the European detergent regulation requiring biodegradable surfactants. The use and performance of the wipe has not changed. Users of the wipes may notice that the wipe no longer has a lemon odor. This is due to the removal of the fragrance from the product formulation. The lemon odor was removed in response to an increase in requests from users for a fragrance free cleaning wipe. The wipe may also have a slight yellowish color. This is due to the off-white color of the new paper towelette.

Users may also notice a change to the product packaging. The package was redesigned to use less material yet maintain the ease of wipe storage and dispensing that users are accustomed to with the 504 Respirator Wipe.

3M is committed to providing you only the highest quality products for your needs. If you have any questions regarding this product change, please contact your local 3M Sales Representative or 3M Occupational Safety & Health Division Technical Service at 1-800-243-4630.

Sincerely,

A handwritten signature in black ink that reads "John A. Kehoe III".
