

3M Track and Trace Solutions
Secure Supply Chain Systems

Seamless Integration

For every challenge, 3M is there

3M addresses your operational, financial and patient safety concerns, turning each into an opportunity for success.

The path to better business

Leveraging 3M's Six Sigma philosophy, lean thinking, the change acceptance process and workflow redesign, 3M is able to gain process visibility and drive continuous improvement, resulting in a rapid return on investment. It's called Business Process Optimization, and it's how 3M delivers superior customer value.

Improved accuracy, enhanced safety

High-value products are tracked from manufacturer to provider, helping to reduce the chance for loss, counterfeiting and inventory problems. This translates into more accurate record-keeping, more efficient operations and a better patient experience.

Seamless integration, ease of deployment

Systems work when they make sense, and are simple to deploy. 3M's data hosting capabilities reduce infrastructure costs while supporting applications that are scalable for large deployments and engineered for ease-of-use.

Service beyond the sale

You can trust 3M to provide continued innovation beyond the initial implementation. From hardware, software and consulting services, the 3M Secure Supply Chain System is there when your patients need it...and so are we. Secure solutions for life.

Secure Supply Chain

Pharmaceutical Authentication

High-Value Asset Inventory Management

Secure solutions for life

3M is at the forefront of innovative technologies developed to address accurate identification, location and management surrounding a range of high-value assets in the healthcare environment. Taking an enterprise-wide approach, 3M delivers solutions that integrate seamlessly with existing systems and operational workflow, to enhance patient safety, optimize revenue and improve your operations.

Now, 3M introduces a scalable track and trace solution for healthcare secure supply chain systems.

Tracking assets such as pharmaceuticals, medical devices and tissue samples from point of origin to point of use, 3M Secure Supply Chain Systems provide inventory, record management and reporting functions for manufacturers, distributors and clinics – employing encryption and RFID technology to store and transmit information.

The 3M Secure Supply Chain System provides a complete solution – software, hardware, data hosting and integration services – to help manage the entire path.

Strength in our history

Since 1972, 3M has been providing healthcare professionals and patients innovative solutions that help make people's lives better. 3M Track and Trace Solutions builds upon this history by providing cutting-edge technology solutions to common healthcare issues. By associating vital patient-centered data with specific high-value assets, hospitals can realize improved operational efficiencies and increased productivity, while delivering an enhanced quality of care and patient safety.

Breadth of our solutions

With strong experience in reliably tracking, protecting and managing assets and people, 3M Track and Trace Solutions blends more than 100 years of knowledge and ingenuity into our technology portfolio. This portfolio has grown over the last two decades to extend our market reach and lead advancements in Automatic Identification (Auto ID) technologies.

Today, 3M Track and Trace Solutions has numerous patents covering RFID technology as well as access to the following Auto ID and location technology protocols: Barcode, Low Frequency RFID, High Frequency RFID, Ultra High Frequency RFID, Active RFID, RTLS and GPS. In addition to Auto ID, we deliver the software application, drivers and interfaces that allow the customer to automate processes as part of their workflow to generate a positive return on their investment.
