Jennifer Farneti Joins CUNO as Scientific Application Support Specialist

Farneti to be based at 3M's Oil and Gas Customer Center in Houston

HOUSTON – June 26, 2008 – 3M Oil and Gas Business today announced that Jennifer Farneti has joined CUNO Incorporated, a 3M company, as a scientific application support specialist (SASS) II for the CUNO laboratory located at 3M's Oil and Gas Customer Center in Houston.

Farneti will be responsible for technical field support to the CUNO sales force, including filtration product trials and customer visits, as well as obtaining and analyzing samples.

“CUNO and 3M are such innovative companies and I'm thrilled to become part of the team,” said Farneti. “The companies' culture of collaboration and opportunities for growth really set them apart from others.”

“Jennifer is an excellent addition to our Customer Center,” said Scott Hanson, business development manager at the 3M Oil and Gas Customer Center. “She'll play a key role in providing local technical service and analytical support for filtration problems both upstream and in refineries.”

“Jennifer's experience will be an asset to our customers,” said Mike Nickerson, Sales Director, CUNO Fluid Process. “We see our commitment to putting technical

support close to the customer as an important advantage to help them solve their filtration difficulties, and Jennifer will play a crucial role in providing this support.”

Farneti brings to CUNO more than ten years of experience in metalworking, fluid sales and technical support. She comes to CUNO from Houghton International, where she served as a technical representative.

Farneti holds a degree in chemical engineering from Ohio University.

3M’s Oil and Gas business has operations in more than 30 countries and is a reliable supplier of thousands of products that are used in virtually every aspect of the industry including exploration, production, refining, transportation and marketing. For more information about 3M’s offerings in the oil and gas industry, please visit

www.3m.com/oilandgas.

CUNO Incorporated, a 3M company, designs, manufactures and markets a comprehensive line of filtration products for the separation, clarification and purification of fluids and gases. CUNO’s filtration products are used in the oil and gas industry in critical upstream production processes where process equipment protection and effluent quality are paramount, such as waterflooding, well completions and glycol dehydration, as well as in refining and gas processing applications, such as amine sweetening and hydrotreating.

About 3M

A recognized leader in research and development, 3M produces thousands of innovative products for dozens of diverse markets. 3M’s core strength is applying its more than 40 distinct technology platforms – often in combination – to a wide array of customer needs. With \$24 billion in sales, 3M employs 75,000 people worldwide and has operations in more than 60 countries. For more information, visit www.3M.com.
