Replace Your Cartridges
& Filters Regularly

When should they be replaced?

3M™ Particulate Filters

Replace both filters once it becomes difficult to breathe comfortably, or if filters become dirty or physical damage occurs. If used in environments containing only oil aerosols, dispose of 3M P-Series filters after 40 hours of use or 30 days, whichever is first.

3M™ Gas & Vapor Cartridges

Replace both cartridges in accordance with your established cartridge change schedule, regulations, or earlier if contaminant can be detected by smell or taste.

For specific advice on when to change your 3M™ Filters or Cartridges talk to your 3M OH&ES Sales Representative or call 3M Technical Service Helpline at 1-800-243-4630
