

Product Shelf Life Information

Technical Data

January 2008 Version 3

Shelf life period for concentrates and products sold as ready-to-use starts at the time the product is shipped to the customer. Shelf life period for ready-to-use (RTU) solutions starts when products are dispensed or diluted by the customer. The following charts define the shelf life periods for 3M Building and Commercial Services chemical products. The following is dependent on products being stored above 40° F (5° C) and below 100° F (37° C) and kept in closed containers such as spray bottle or flip top bottles. Products dispensed into an open container such as mop buckets or hand pails must be made daily or more often as soil load dictates.

3M™ Twist 'n Fill™ Products -	Concentrate (as received)	Ready-to-use (as dispensed)
All Cleaners	2 years	6 months
