

Maintaining a Secure and Viable System

At 3M Health Information Systems, we understand healthcare IT is not the “average” technology environment. In a large enterprise, you can find yourself supporting hundreds of systems, applications and servers, as well as thousands of users and desktop systems spread across multiple physical locations. As a healthcare IT professional, you are challenged every day to:

- Lower the cost of ownership while meeting constantly evolving requirements
- Achieve interoperability among disparate systems
- Provide centralized control for easy connectivity, deployment, expansion, and customization
- Protect system security and document privacy
- Support the unique requirements of a wide variety of system users
- Choose stable technology partners who will be with you for the long haul

3M: Your core HIM vendor

With 3M as your core HIM vendor, your IT team can turn to a single vendor for support during implementation, software updates, and ongoing maintenance. 3M interoperable and easy-to-deploy solutions can help you reduce complexity, save time and control costs.

3M supports single sign-on integration, combining your dictation, transcription, chart management, abstracting, forms management, document capture and document viewing through a single vendor.

Integrated, interoperable systems

Reduce your integration headaches by letting 3M help with connectivity, deployment, expansion, and customization challenges. Both 3M-hosted and web-enabled applications can be integrated with your existing systems. We work with industry-standard technologies and interfaces to provide services that integrate with your RIS and PACS systems. We also integrate and often partner with the major HIS systems on the market and many smaller vendors.

Flexible platforms for today and tomorrow

Built on platforms designed to enhance your current operating environment while remaining open to future technology, 3M solutions:

- Are compatible with industry-standard technology, such as Microsoft® Windows® XP
- Deliver HIPAA-enabled applications that use today's standard PC and networking technology
- Offer easy, click-once deployment to workstations

Security

- Symmetric and asymmetric key encryption
- Public key encryption
- SSL
- Enhanced HIPAA compliance through strong reporting capabilities
- CCOW-enabled
- Single sign-on
- Automatic logoff after user-defined period of system inactivity
- Auditing capability that tracks all user activity
- Integration with security features of industry-standard servers and databases to capture additional audit data

Implementation and support

3M delivers installation and training services to help our clients get the most out of their 3M investment. With thousands of successful implementations, 3M has the knowledge and ability to meet your immediate needs and help you maintain your system over the long term. Our implementation experts can help minimize the impact on your IT staff, and with 24/7 support services committed to quick response and issue resolution, 3M is there to help you along the way.
