Commercial Air Filtration

# Cleaner Air Less Energy

## Did you know?

Reducing air flow resistance in your HVAC system by as little as 0.25" w.g. can save over \$26,000 in fan energy per million square feet of your facility portfolio.\*

Using Filtrete<sup>™</sup> Commercial Air Filtration products from 3M is one way to reduce the overall system airflow resistance. For more information on how 3M can help you reach your energy reduction objectives without additional capital expenditures, call 800-648-3550.

\*Energy assessment is provided for a general indication of possible savings and 3M does not warrant or guarantee that use of its products will result in any specific energy savings. Assumes 1 cfm/sqft, 3300 hours of operation, and \$0.15 per kWh using fan law relationships.
