

ILS Open Plus™

Intelligent Library System

Introducing the ISO-compatible Intelligent Library System!!

- Speedy transactions
- Item identification
- Integrated monitoring

The next revolution of the Intelligent Library System!

In 1999, Checkpoint introduced the Intelligent Library System (ILS) – the industry's first RFID-based circulation and collection management system. ILS featured our unique security design, which provided the fastest circulation transactions anywhere and eliminated false alarms. ILS Open Plus delivers the same benefits as our original system, while also supporting ISO-standard tags and readers.

The ILS Open Plus is a complete solution that includes:

- ISO-compliant RFID tags for books and CDs/DVDs
- Customer-friendly Self-Checkout stations – tabletop, free-standing and built-in models
- DiscMate™ Intelligent Unlocking Station for self-checkout of CDs/DVDs
- Staff Station Readers – convenient for use at the circulation desk, technical services area and in book drops
- CheckVIEW monitoring, allowing one staff member to assist multiple customers at several self-checkout stations
- Hand-held portable reader, to make quick work of inventory, search, shelf-order and weeding functions
- Detection systems to secure your entrances and exits

Checkpoint provides libraries the freedom to choose the RFID system that best fits their needs. For libraries committed to standards, ILS Open Plus offers premium performance and ISO compatibility. For libraries requiring the greatest read range and widest exit, our original Intelligent Library System is the best choice.

Benefits to patrons

- Faster transactions save customers valuable time – self-checkout lines move quickly!
- No false alarms means hassle-free visits to the library
- Faster check-in processing leads to shorter cycle time, plus enhanced security, which means increased availability for the most popular items

Benefits to libraries

- ISO-compatible RFID tags
- Monitoring console alerts staff to problems (such as paper refills needed at self-check stations), so you can fix them before they affect your customers
- Fast conversion of your entire collection makes it easier to convert to RFID

ILS Open Plus offers customers the fastest circulation transactions in the industry, making self-checkout a snap.

RFID gives your customers the best experience possible for circulation and secure transactions.
