

Smart Access Manager™

A comprehensive solution for managing public PCs

The Comprise™ Smart Access Manager (SAM™) is a comprehensive self-service system for managing public PCs in your library. Using current library cards, this scalable solution can interface with leading integrated library systems and features advanced architecture that can be configured through the Internet for anywhere, anytime web-based administration. With the activity manager, staff can access data, record payments, view computer activity, log customers on and off, send messages, extend sessions, and shut down PCs—all from the convenience of their desks. In addition to improving efficiency and reducing costs, the system serves as a solid foundation for a long-term technology plan.

Authentication Manager

- Provides automated log on for customers and visitors
- Dynamically links with ILS automation software for maintenance

Sign-Up Manager

- Lets the customer sign up for PCs at the library

Print Manager

- Automatically applies library's print limits and enables the library to control or recover print cost
- Account based using existing library card
- No print release station required
- Charges can be different by individual user, 4-color vs. black-and-white, groups, branch and allow for free pages
- Can provide cost recovery for copier and microfiche

Report Manager

- Generates statistical usage and comprehensive financial reports

Session Control

- Enforces session rules for customers and visitors, wired or wireless
- Provides session flexibility for non-busy times
- Maintains Internet access consistent with library policies

Web-Based Administration

- Anywhere, anytime management of SAM software and related peripheral hardware devices
- Provides multiple level views for configuration and maintenance and updates the database
- Auto adapter applies configuration changes and updates the software

Account Payment

- Utilizes existing library card
- Offers cardless account-based reconciliation
