

3M™ ClinTrac™ Quality Manager Software

- Control quality management processes
- Improve integrity and security of clinical data
- Promote communication and teamwork
- Improve patient care

Define. Determine. Progress.

3M ClinTrac Quality Manager (QM) Software gives you the ability to precisely design reviews and studies, monitor their progress and document the results—all in a single location. Not only can you collect, store and report quality indicator and measurement data in your facility, but 3M ClinTrac QM lets you define the workflow for that data collection, as well as the review and submission requirements. By recording the results of each study in a consistent format, 3M ClinTrac QM helps to measure progress—so you can continue to improve the quality and performance of your hospital.

The 3M advantage

- Improves accuracy, scope and flexibility of quality reviews by using information already captured in other 3M ClinTrac applications by other departments
- Integrates key quality, clinical and case management data to support performance improvement
- Facilitates even the most complex peer reviews by integrating pertinent information when and where it is needed
- Supports comprehensive root cause analysis processes via in-depth analysis, assessment and documentation of patient care issues or sentinel events
- Enables compliance with The Joint Commission, Centers for Medicare and Medicaid Services, and state-mandated quality reviews

3M™ ClinTrac™ Quality Manager Software

Features

- Central location for quality management processes—allowing providers to focus on real-time quality improvement activities
- Ability to design quality reviews by patient, non-patient, provider, or facility
- Ability to assist in the implementation and documentation of regulatory corrections
- Capability to trigger specific review screens during chart abstracting based on any number of parameters such as diagnosis code, patient type, and others

Integration

3M ClinTrac QM can be integrated with:

- **3M™ ChartView™ Software** and **3M™ ChartScript™ Software**—View electronic documentation and transcription reports for a patient.
- **3M™ ClinTrac APC Pro Software** and **3M™ ClinTrac Clinical Abstracting Software**—View abstracts and coding data.
- **3M™ ClinTrac Care Planning Manager** and **3M™ ClinTrac Infection Control Manager Software**—View more complete clinical information.

Reporting

With the included report writer, you can create custom *ad hoc*, on-the-fly reports. Sort and select data according to the parameters required by your organization.

Security

To maintain appropriate access to sensitive data, 3M applications provide user-specific security features:

- Individual user ID and password logon
- Automatic logoff after user-defined period of system inactivity
- Facility-defined access levels and assignments, including the ability to exclude access to records based on specific record characteristics, such as patient type
- Audit trail capabilities within the application to provide detailed information about user activity
- Integration with security features of industry-standard servers and databases to capture additional audit data

Technology

Built on platforms designed to enhance current operating environments while remaining open to future technology, 3M solutions are:

- Compatible with industry-standard technology, such as Microsoft® Windows® 2000 and XP
- HIPAA-enabled applications that operate using today's standard PC and networking technology
