3M ClinTrac Care Planning Manager (3M ClinTrac CPM)

is a key component of the case management efforts in your facility. Integrating case management, social services, resource management and discharge planning in one comprehensive solution, 3M ClinTrac CPM—part of the 3M ClinTrac suite—links an entire enterprise while providing access to patient data. It gives your staff the tools they need to quickly identify issues that impact denial management and length of stay, giving them the time they need to focus on patients in your care.

The 3M ClinTrac CPM advantage

- Enhances case management decisions using real-time data
- Reduces length of stay and payer denials
- Facilitates denial management processes
- Improves communication between the patient, healthcare providers, payers, health information management and other operational functions, such as billing, to receive timely payment for services rendered
- Increases productivity with worklists and dynamic screens for easy site definability, streamlining and managing processes and workflow
- Captures more pertinent information, including accurate and consistent statistics to support denial management initiatives, payer contract negotiations and quality improvement programs
- Eliminates redundant data-gathering efforts to save time and money

3M ClinTrac CPM at work

Medical center on its way to eliminating incomplete charts

“Prior to building a digital health information system from the ground up, Nebraska Heart Hospital looked for a core vendor with a reputation for reliable, scalable and fully-integrated products. We chose 3M, including ClinTrac Care Planning Manager. We are able to document easily and consistently on all patients. Reports are readily accessible for quick reference and accurate data. I feel CPM is a great tool that has maximized our communication and enhanced our Electronic Health Record.”

—Terri Rose, RN, Care Management Team Leader, Nebraska Heart Hospital

3M™ ClinTrac™ Care Planning Manager Software

Features

- Automated workflow through rules-based worklists
- Ability to create user-defined documents and letters with capability to fax and email
- Real-time alerts for proactive care management
- Automated referrals among care management team members
- Ability to identify key changes in interface data fields including payer changes
- Ability to define episodes of care
- Comprehensive discharge planning that includes facilitating and tracking referral sources to outside agencies
- View diagnoses and procedures to assist with developing patient's relevant history and past treatment
- Ability to keep payer requirements and agency demographics online
- Supports DRG documentation review
- Clinical and quality indicators
- Clinical pathways
- Unlimited data import and export capabilities

Integration

3M ClinTrac CPM can be integrated with:

- **3M™ ChartView™ Software and 3M™ ChartScript™ Software**—View electronic documentation and transcription reports for a patient.
- **3M™ ClinTrac™ Software Suite**—Flexible applications that allow care providers and outcomes management personnel to achieve positive financial results and meet dynamic regulatory requirements. Applications include inpatient and ambulatory abstracting; case management, utilization review and discharge planning; infection control management; and quality management.
- **Third-party review criteria**— Work with standards such as InterQual® and MCAP
- **ADT**—Real-time HL7 integration.

Reporting

- Use a wide array of standard reports including payer denials analyses, physician practice patterns and care variances
- Take advantage of the industry-leading Crystal Reports® package
- Schedule, generate and print standard reports from any ClinTrac workstation
- Write custom reports to meet specific information needs

Security

To maintain appropriate access to sensitive data, 3M applications provide user-specific security features:

- Individual user ID and password logon
- Automatic logoff after a user-defined period of system inactivity
- Facility-defined access levels and assignments, including the ability to exclude access to records based on specific record characteristics (such as patient type)
- Audit trail capabilities within the application to provide detailed information about user activity
- Integration with security features of industry-standard servers and databases to capture additional audit data

Technology

Built on platforms designed to enhance current operating environments while remaining open to future technology, 3M solutions are:

- Compatible with industry-standard technology, such as Microsoft® Windows® 2000 and XP
- HIPAA-enabled applications that operate using today's standard PC and networking technology
