

3M™ ClinTrac™ Clinical Abstracting Software

- Improve revenue cycle for billing
- Facilitate access to data
- Enhance accuracy and efficiency
- Increase productivity and cost savings

Collect. Code. Customize.

3M ClinTrac Clinical Abstracting

(3M ClinTrac CA) is a robust abstracting tool that can be shared securely within your facility and throughout your healthcare enterprise. Quickly maximize coding and data entry efficiencies, reduce billing delays, provide comprehensive reporting capabilities and streamline workflow. With unmatched functional depth, 3M ClinTrac CA integrates seamlessly with leading encoding and grouping systems, as well as with other 3M applications. The result? Improved productivity by your employees and better outcomes for your patients.

The 3M ClinTrac advantage

- Enhances data retrieval for decision-making
- Reduces billing delays and minimizes unbilled claims
- Increases efficiency with methods of collecting, reporting, transferring and viewing data
- Provides in-depth, quality patient data to meet daily, weekly, monthly and quarterly requirements
- Improves accuracy and efficiency through finalization conditions and aggregating data
- Tailors fields and screens for streamlined workflow and efficient abstracting
- Enables compliance with current coding regulations

3M ClinTrac CA at work

UVA Health System realizes 73 percent increase in productivity

The University of Virginia Health System (UVAHS) in Charlottesville, Virginia, was one of the first customers to use 3M ClinTrac CA. Prior to installation, UVAHS and 3M's implementation team reviewed all the abstract fields and forms to determine their use and effectiveness, and then enhanced aspects of 3M's application to meet the needs of UVAHS. "UVAHS is able to respond to regulatory agencies' requests much faster and pull patient charts more quickly than ever before. All employees have been empowered with the ability to navigate and execute in CA," says Scottie Ann Frey, UVAHS's HIS systems analyst.

UVAHS's staff rapidly reaped the rewards of 3M ClinTrac CA's enhanced reporting capabilities, allowing the end user to retrieve information quickly without specialized training. In general, UVAHS has realized a 73 percent increase in productivity and cost savings with the software. "The productivity reports from CA are easy to run," according to Frey, adding that they "have enabled us to monitor productivity for management purposes and to provide some feedback to the coding staff."

3M™ ClinTrac™ Clinical Abstracting Software Features

- Multiple methods to collect, report, transfer and view data
- Seamless integration with leading encoder and grouper systems and mainframes
- Customizable imports/exports to bring external data into the system or export data to another system
- Event triggering options, including options to trigger specified events after a record closes
- Comprehensive, user-defined security settings and audit trails
- ICD-10 compliant
- Multiple real-time, HL7 interfacing to host and ancillary systems
- Data validation and editing
- Tailored data capture screens for: mortality, blood usage, newborn, delivery, medications and nursing unit data
- Recording of complications and co-morbidity data
- Viewing of transcribed reports and other electronic documents
- Drill-down capability to view records for each episode of care for the same patient
- “On-the-fly” user-defined data fields
- Comprehensive, professionally designed standard reports with unlimited *ad hoc* reporting
- Report builder tool for instant data retrieval
- Ability to produce worklists for coders/abstractors
- Customer-defined mandatory fields for finalization, verifying all edits prior to dropping a bill

Integration

3M ClinTrac CA can be integrated with:

- **3M™ ChartView™ Software and 3M™ ChartScript™ Software**—View electronic documentation and transcription reports for a patient.
- **3M™ ClinTrac™ Software Suite**—Flexible applications that allow care providers and outcomes management personnel to achieve positive financial results and meet

dynamic regulatory requirements. Applications include inpatient and ambulatory abstracting; case management, utilization review and discharge planning; infection control management; and quality management.

Reporting

- Implement a wide array of immediately useful and integrated standard reports that have been modeled on real-life clinical requirements
- Take advantage of industry-standard reporting tools, including Crystal Reports®
- Generate, print and export standard reports from any 3M ClinTrac workstation
- Quickly write custom reports to meet information needs

Security

To maintain appropriate access to sensitive data, 3M applications provide user-specific security features:

- Individual user ID and password logon
- Automatic logoff after a user-defined period of system inactivity
- Facility-defined access levels and assignments
- Integration with security features of industry-standard servers and databases to capture additional audit data

Technology

Built on platforms designed to enhance current operating environments while remaining open to future technology, 3M solutions are:

- Compatible with industry-standard technology, such as Microsoft® Windows® 2000 and XP
- HIPAA-enabled applications that operate
