

3M™ ChartScan™ Software

- Make paper documents available anytime, from anywhere
- Improve patient care and reduce costs
- Increase efficiencies with on-demand form generation
- Electronically capture patient records without increasing staff

Identify. Index. Print.

3M ChartScan is a cost-effective document imaging and management solution that electronically captures patient records using a patented process.* It provides you with the tools to enhance productivity, lower labor costs, and increase accuracy. 3M ChartScan can help you bridge the gap between the demand for increased record availability and the management of that record.

The 3M ChartScan advantage

3M ChartScan's innovative design helps speed access to patient information, save time and reduce costs by:

- Enabling you to readily capture paper documents electronically
- Using existing forms (virtually eliminating forms redesign)
- Eliminating inaccuracies of manually indexed patient documents
- Automatically indexing forms to patient, visit, page number and orientation
- Alerting you if the patient chart is incomplete
- Streamlining workflow for point of service (POS)
- Maximizing work queues

3M ChartScan at work

Northwestern Memorial Hospital moves from paper to electronic records

Before purchasing and installing 3M solutions, Northwestern staff looked not only for financial gains and impacts, but also evaluated how the changes would affect the experiences of both patients and staff.

This evaluation told them that laser-generated documents were more legible for patients and immediately available as part of the medical record. The Northwestern staff also found it much easier to print laser forms on demand.

According to Carol Pierce, clinical systems manager, having electronic access to scanned documents has also had a huge impact on the hospital's revenue cycle. "The faster documents get to them, the sooner the bill gets dropped."

Pierce adds, "From a coding perspective, these records are available sooner, the coding process gets started much sooner, and the bill is dropped faster."

*U. S. Patent No. 6,772,943 for 3M ChartScan's innovative process.

3M™ ChartScan™ Software

Features

- Patented process automatically indexes documents to correct patient encounter, document type, page number and orientation
- Identifies documents in correct page order and alerts you if any pages or documents are missing from the chart
- Prints personalized individual forms or form packets for patients from anywhere throughout your facility
- Batch scanning and quality check processes
- Prints patient wristbands with user-selected information including barcodes (MRN) to promote positive patient identification
- Scans documents at the point of service directly into the patient's chart making them immediately available in the patient record
- Captures patient signatures electronically via electronic signature pads and clipboards
- Digital photo capture
- Imports faxed documents as well as other document formats

Integration

3M ChartScan integrates with:

- **3M™ ChartView™ Software**—Allows for online viewing of patient information and electronic documents.
- **3M™ RAAS DL™ Software**—Supplies long-term storage for electronic documents with easy retrieval.
- **3M™ ClinTrac™ Product Suite**—Enables users to view scanned images online for coding and case management.
- **3M™ ChartQ Software**—Provides workflow management for online chart completion and coding.

Reporting

- Scanning and QC productivity, turnaround statistics and volume reports facilitate management processes
- Identify missing personalized forms printed, but not yet scanned

Technology

3M ChartScan is built on a platform designed to enhance current operating environments while remaining open to future technology.

- Compatible with industry-standard technology, such as Microsoft® Windows® XP
- HIPAA-enabled applications that operate using today's standard workstation and networking technology

In addition, 3M ChartScan is compatible with Fujitsu high-speed scanners and most major brands of high-speed scanners; Kofax® Adrenaline® card and any high-speed scanner that works with Kofax Adrenaline technology; and TWAIN-compatible scanners.
