

3M™ ChartView™ Software

- Instant, secure access to patient charts
- Streamline workflow
- Improve productivity

Access. View. Act.

3M ChartView is an innovative and practical solution providing instant, secure access to patient records from any workstation on a hospital network or virtually anywhere. 3M ChartView provides the appropriate members of your care team with simultaneous access to the patient record. Whether patient information is dictated, scanned, or collected from third-party systems, you'll be able to migrate from a paper system to an online one (or bridge both in a hybrid environment) giving your care providers real-time access to patient documentation anywhere at any time.

The 3M ChartView advantage

- Improves patient care by making patient information available in real time
- Provides direct, easy access to patient information, clinical data, transcribed documents, and paper records
- Enables simultaneous access to a patient record for parallel processing
- Integrates seamlessly with 3M™ Electronic Signature Authentication Software, an easy-to-use, flexible 3M product that allows you to view, edit and electronically sign patient documents from anywhere
- Provides increased security by tracking the viewers of documents, as well as restricting the view of certain document types by user profile
- Facilitates compliance with regulatory requirements through audit tracking
- Decreases document retrieval time for requests by payers to support claim payment

3M ChartView at work

Mary Lanning Memorial boosts turnaround times

According to Tammy McNeil, RHIA and director of Health Information Management at Mary Lanning Memorial Hospital in Hastings, Nebraska, 3M ChartView is the software tool that makes documents available to staff online, using workflow sequences that can also help the staff set priorities and work more efficiently.

“The versatility of ChartView made it possible for us to streamline our workflow and processes. As a result, we’ve been able to make significant improvements in both our turnaround times and our revenue cycle.”

3M™ ChartView™ Software

Features

- Interactive, responsive and familiar user interface
- View clinical results and patient information in various formats, including TIFF, RTF, HTML, digital audio dictation files, ERM/COLD-fed reports and more
- Provide flexible, individually tailored views of documents for different end-users, physicians or departments lists
- View patient information for a single visit or all available patient encounters
- Create online queries and lists
- Designate which users can print official medical record copies
- Import documents such as laboratory results, radiology reports and third-party imaging system documents for online viewing (when using 3M™ ChartLinc Software)
- Enable review and signing of documents from anywhere (when used with 3M™ Electronic Signature Authentication Software)

Integration

3M ChartView can be integrated with:

- **3M™ ChartScan™ Software**—Intelligent, patented scanning application that automates forms, production and indexing.
- **3M™ ChartLinc Software**—Supplies patient registration data and clinical results via HL7 to 3M ChartView.
- **3M™ ChartScript™ Software**—Allows staff to transcribe dictation and edit speech-recognized documents, even remotely.
- **3M™ ChartScriptMD™ Software**—Enables dictation and sign-off of chart in one step, virtually eliminating transcription costs. This is a front-end speech recognition application based on SpeechMagic™ technology.
- **3M™ ChartFact™ Software**—Analyzes deficiencies and helps reduce chart completion time.

- **3M™ ChartRelease™ Software**—Manages release of information, reducing chart retrieval time.
- **3M™ Electronic Signature Authentication Software**—Enables physicians to review and sign records online.
- **3M™ RAAS DL™**—Provides fast retrieval of electronic documents.
- **3M™ ClinTrac™ Product Suite**—Provides view of online medical record while coding or performing case management or quality reviews.
- **3M™ VoiceScript™ Software**—Allows your care providers to dictate anywhere, anytime with the 3M digital dictation management system.

Security

To maintain appropriate access to sensitive data, 3M applications provide user-specific security features:

- Individual user ID and password logon
- Restrict access with override capability as needed; override capability is specifically audited
- Automatic logoff after user-defined period of system inactivity
- Auditing capability that tracks all user activity
- Integration with security features of industry-standard servers and databases to capture additional audit data backend security features

Technology

Built on platforms designed to enhance current operating environments while remaining open to future technology, 3M solutions are:

- Compatible with industry-standard technology, such as Microsoft® Windows® XP
- HIPAA-enabled applications that use today's standard PC and networking technology
- Easy, click-once deployment to workstations
