

## 3M™ ChartScript™ Software

- Reduce transcription costs
- Increase productivity
- Improve document turnaround time
- Enjoy transactional pricing and no large, up-front capital expenditures

### Create. Distribute. Deliver.

3M ChartScript is an intelligent transcription tool designed specifically for the medical transcription environment. It is easily deployed on your hospital network or hosted on the 3M secure data center for an even easier rollout. 3M ChartScript meets the productivity and accuracy needs of transcriptionists, editors, quality assurance personnel, and managers.

The solution employs back-end speech recognition by SpeechMagic™. With 3M ChartScript, work can easily and securely route to staff transcriptionists (remote or onsite) or to a medical transcription service organization (MTSO).

Using patient information and customized document types, you can transcribe documents and automatically distribute them directly to the patient's location and to the provider according to your specification. 3M ChartScript can help improve workflow and productivity in your department, making your job easier and saving you money.

### The 3M ChartScript advantage

- Supports large multi-facility environments
- Supports remote transcriptionists
- Enables improved productivity with back-end speech recognition technology from SpeechMagic™
- Enhances accuracy with data from multiple systems
- Improves communications with browser-based technology
- Reduces cost and turnaround time
- Increases productivity with an intelligent tool that assembles text to your specifications
- Allows you to create, use and analyze multiple line counting methods

### 3M ChartScript at work

#### **Mercy boosts productivity by 35 percent in just six months**

Impressed by the features of 3M ChartScript and the 3M interfaces, Mercy Medical Center—a 365-bed facility—rolled 3M ChartScript out to its affiliated clinic, Mercy Family Care. Within six months of installation, 3M ChartScript provided a more than 35 percent increase in productivity for transcriptionists on the inpatient side. As a result of increased productivity, Mercy has eliminated its need for outsourced transcription.

#### **Providence Healthcare uses speech recognition to increase transcriptionist productivity by 22 percent**

Providence Healthcare—a seven facility, 700-bed organization—was struggling to keep up with its growing volume of dictations with their existing staff of medical transcriptionists. Within three days of implementing 3M ChartScript, they began to see an increase in productivity.

# 3M™ ChartScript™ Software

## Features

- User-friendly design
- Productivity-enhancing tools such as keyboard shortcuts, abbreviation expanders, normals and integrated dictation playback
- Tools to help run a geographically diverse transcription team and facilitate communication in a virtual environment
- QA feature set to help improve document quality
- Remembers playback volume and speed settings for specific combinations of individual transcriptionist, dictator and document type
- Automates patient data updating
- Enables you to build productivity-based incentive plans

With 3M back-end speech recognition, these additional features are also available:

- Easy-to-use speech editor
- Transcriptionists receive “ready for editing” documents, starting them that much closer to the final desired format
- “Speaker profiles” are created based on existing dictation and transcription results; no enrollment script is required
- For maximum accuracy, 3M ChartScript relies on information specific to the speaker
- Customizable user access levels and document security design

## Reporting

- Produce standard or custom reports with a user-friendly report generator
- Quickly monitor user and system statistics, including production and backlog figures
- Audit and analyze line counts from MTSOs to evaluate service and more easily reconcile bills

## Integration

Recommended additions to 3M ChartScript include **3M™ VoiceScript™ Software** for voice capture and **3M™ ChartLinc Software** for interfacing ADT, registration, RIS data download, and document exports.

3M ChartScript also integrates with:

- **3M™ ChartFax Software**—Distribute documents via fax and e-mail.
- **3M™ Electronic Signature Authentication Software**—Lets your care providers sign and edit patient documentation anytime from virtually anywhere.
- **3M™ ChartView™ Software**—View patient information, clinical data, transcribed documents and even paper records online in real-time.
- **3M™ ClinTrac™ Product Suite**—Capture and analyze clinical data.
- Third-party voice acquisition tools.

Based on your needs, modular components can be added to reduce the cost of compiling health information and the opportunity cost of care providers’ time.

## Technology

Built on platforms designed to enhance current operating environments while remaining open to future technology, 3M solutions are:

- Compatible with industry-standard technology such as Microsoft® Windows® XP
- HIPAA-enabled applications that operate using today’s standard PC and networking technology
