

Work in a World of Comfort

The new 3M™ S-Series Hoods and Headcovers

Introducing the lightweight, loose-fitting S-Series Hoods and Headcovers for 3M powered and supplied air respirators. Developed from a computer model of worldwide head sizes—and combined with new sizing and adjustment options—the S-Series Hoods and Headcovers can be comfortably worn by more users.

Wearers enter a world of improved airflow distribution and low noise, with soft face, neck or shroud respiratory seals, and minimized visor distortion. Choose from five ready-to-use integrated suspension Hoods and Headcovers or three premium reusable suspension Hoods for highly cost-effective replacement of outer fabrics.

S-Series Improvements

Comfortably Worn by More Users

Based on computer modeling of a worldwide sampling of head sizes, the new S-Series suspensions, through their sizing and adjustment options, will comfortably fit more wearers than previous models.

Simple maintenance

Premium reusable suspension hood assemblies (S-655, S-657 or S-757) feature cost effective, easily replaceable outer fabrics.

Easy to Connect and Disconnect

All S-Series Hoods and Headcovers are compatible with the 3M Quick Release Swivel (QRS) breathing tube connection. The QRS connects quickly and swivels to minimize loops and kinks in the breathing tube.

Improved Visibility

S-Series visors have excellent field of view with reduced curvature for decreased reflections and glare.

Airflow Adjustment

Premium reusable suspension hood assemblies (S-655, S-657 or S-757) allow wearers to control the location of the airflow.
