

Cuts Fast, Cuts Cool

As much as 3X higher cut rate than the leading unitized wheel brands

One easy-to-use wheel does the work of several specialty abrasives:

Fast, easy weld blending. The fast cutting action, smooth feel and outstanding control of Standard Abrasives Unitized Wheels 913 and 993 make them ideal for weld blending. 90° weld blending provides fast action and produces a consistent finish. Reach hard-to-reach spaces in both I.D. and O.D. weld blending. Available in an assortment of sizes, densities and grades. Save time with fast cutting which requires fewer tool changes. Ease of operation allows for greater productivity.

Fast, easy deburring. The added cutting power and consistency helps operators breeze through a wide range of tough deburring applications quickly. The conformability of its fiber web makes it easier to apply just the right amount of pressure, so there's less chance of over-cutting or damaging the part. Unitized Wheels efficiently remove burrs fast.

Standard Abrasives Unitized Wheels can do the work that used to require several specialty abrasives. This means operators can consolidate their toolsets down to one, hard-working wheel that's easy to use.

Standard Abrasives Unitized Wheels 913 & 993

- Tests indicate up to 3X higher cut rate than other unitized wheels
- Consistent finishes
- Easy handling
- Long lasting
- Fast cutting
- Cuts cool, which help eliminate burnishing and heat stress

Standard Abrasives Unitized Wheels – Type 913

PART NO.	SIZE	SYSTEM	DENSITY	GRAIN	MAX. OPERATING SPEED (RPM)	WHEELS/BOX	BOXES/CASE
