

# Environmental, Health and Safety Policy

---

## Corporate Energy Policy

### Applies To

This policy applies to all 3M operations.

### Policy Statement

3M will seek to both promote the efficient use of energy in our operations and to deliver products to our customers that help them save energy.

### Additional Elements

3M is committed to continual energy performance improvement and will take the following steps to support this policy:

- Assess energy performance in our existing operations, in the construction of new facilities, in the development of new products and where applicable, in the procurement process.
- Implement an effective energy management system that supports manufacturing capabilities while providing a safe and comfortable work environment with the information and resources needed to set and achieve appropriate energy objectives and targets.
- Secure adequate reliable, and when feasible, renewable energy supplies at competitive rates and conduct appropriate contingency planning activities to protect operations from interruptions.
- Encourage continuous energy performance improvement by employees in their work and personal activities.
- Drive development and application of innovative energy efficiency technologies in our products and through our operations.
- Cooperate, when feasible, with governmental agencies, utility companies and other organizations on energy programs and comply with all legal requirements relating to energy use, consumption and efficiency.
- Report progress toward 3M's energy objectives and targets to executive management and external stakeholders on a regular basis.
