

3M™ Nameplate Repair Tape 06385

Technical Data Sheet

General Description

3M™ Nameplate Repair Tape 06385 is a gray, .030-inch thick, medium-density, closed-cell acrylic foam tape with high performance adhesives on both sides. It is characterized by high peel and shear adhesion, high internal strength, good conformability and excellent plasticizer resistance.

3M nameplate repair tape 06385 is thinner than other 3M attachment tapes to offer inconspicuous attachment of emblems and nameplates. Its gray color blends in for a professional-looking repair. The roll size is narrow and thin, making emblem repair faster and easier.

Intended for emblem and nameplate repair applications, the narrow tape width of 3M nameplate repair tape 06385 makes intricate emblem part repair fast and easy. 3M nameplate repair tape 06385 is not recommended for the repair and replacement of heavier automotive trim such as body side moldings. 3M offers several other tapes more suitable for those more demanding applications.
