

**3M**

**Filtek™**

Dental Restoratives

**Experience the difference**

# That was then.

Is it time  
to update  
from the  
composite  
you're  
using  
now?

## 3M™ Z100 MP Restorative

- Microhybrid to enable universal use
- Developed to overcome the esthetic challenges of traditional macrofills
- Overcomes the wear and strength challenges of microfills

## 3M™ Filtek™ Z250 Universal Restorative

- Microhybrid to enable universal use
- Improved resin system resulting in better handling
- Available in 12 shades

In their day, microhybrids offered a significant improvement over older macrofills and microfills. Since then, 3M has raised the bar with our TRUE nanotechnology.

## Microhybrid technology

As the resin wears, large and unevenly sized filler particles are exposed. This creates a rough and uneven surface as they break away from the resin matrix.

What does this mean for your restoration?

- Compromised esthetics
- Decreased polish retention

# This is now.

## 3M™ Filtek™ Supreme XTE Universal Restorative

### Exceptional esthetics and outstanding strength

- TRUE nanofiller technology enables unsurpassed esthetics and polish retention
- Over 600 million restorations globally\*
- Outstanding strength and esthetics for both anterior and posterior use
- Exceptional handling
- Excellent wear resistance
- Available in 36 shades, 4 opacities for exceptional esthetics

## 3M™ Filtek™ One Bulk Fill Restorative

### Simple, one-step bulk fill placement up to 5 mm

- Two innovative monomers enable bulk filling by providing stress relief
- TRUE nanofiller technology for excellent strength and wear resistance
- Fast and easy posterior restorations
- One-step placement, no additional capping layer
- Increased opacity for improved esthetics
- Excellent handling

The advancement of our TRUE nanofiller technology has resulted in a full line of restorative solutions that offer unsurpassed esthetics and simplicity.

## TRUE nanofiller technology

Nanoparticles are uniquely formed into nanoclusters. As these nanoclusters wear, they maintain a uniform and smooth surface.

What does this mean for your restoration?

- Excellent esthetics
- Higher polish
- Improved polish retention
- Excellent wear resistance
