

Advanced CDI

Clinical documentation improvement: Moving from the present state to the future

Traditional CDI Programs only review cases for inpatient stays longer than **2 or 3 days**.

A red shield-shaped icon with a white border, containing the text "40%".

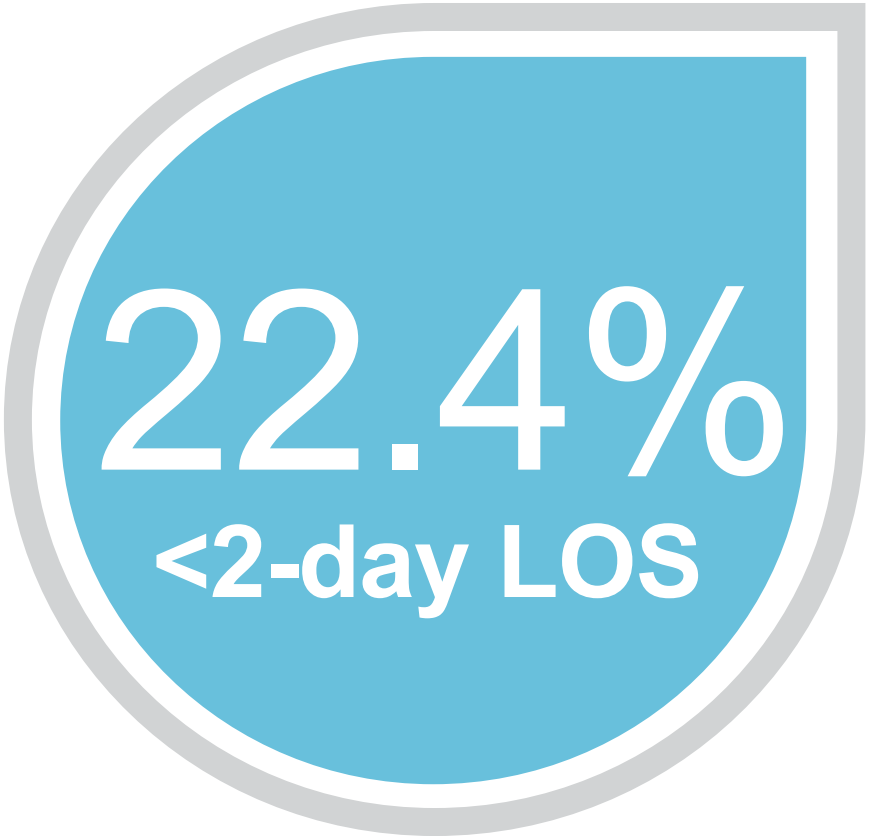

40%

Up to 40 percent of cases are **NOT** reviewed

Cases reviewed by CDI*

A dark blue shield-shaped icon with a white border, containing the text "77.6% >2-day LOS".

77.6%
>2-day LOS

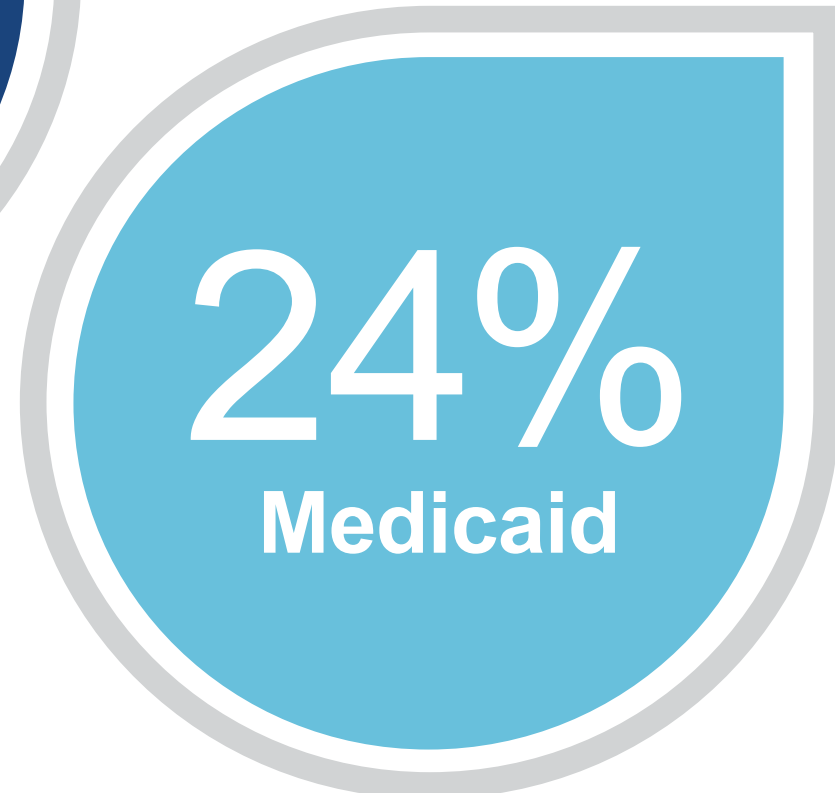

A light blue shield-shaped icon with a white border, containing the text "22.4% <2-day LOS".

22.4%
<2-day LOS

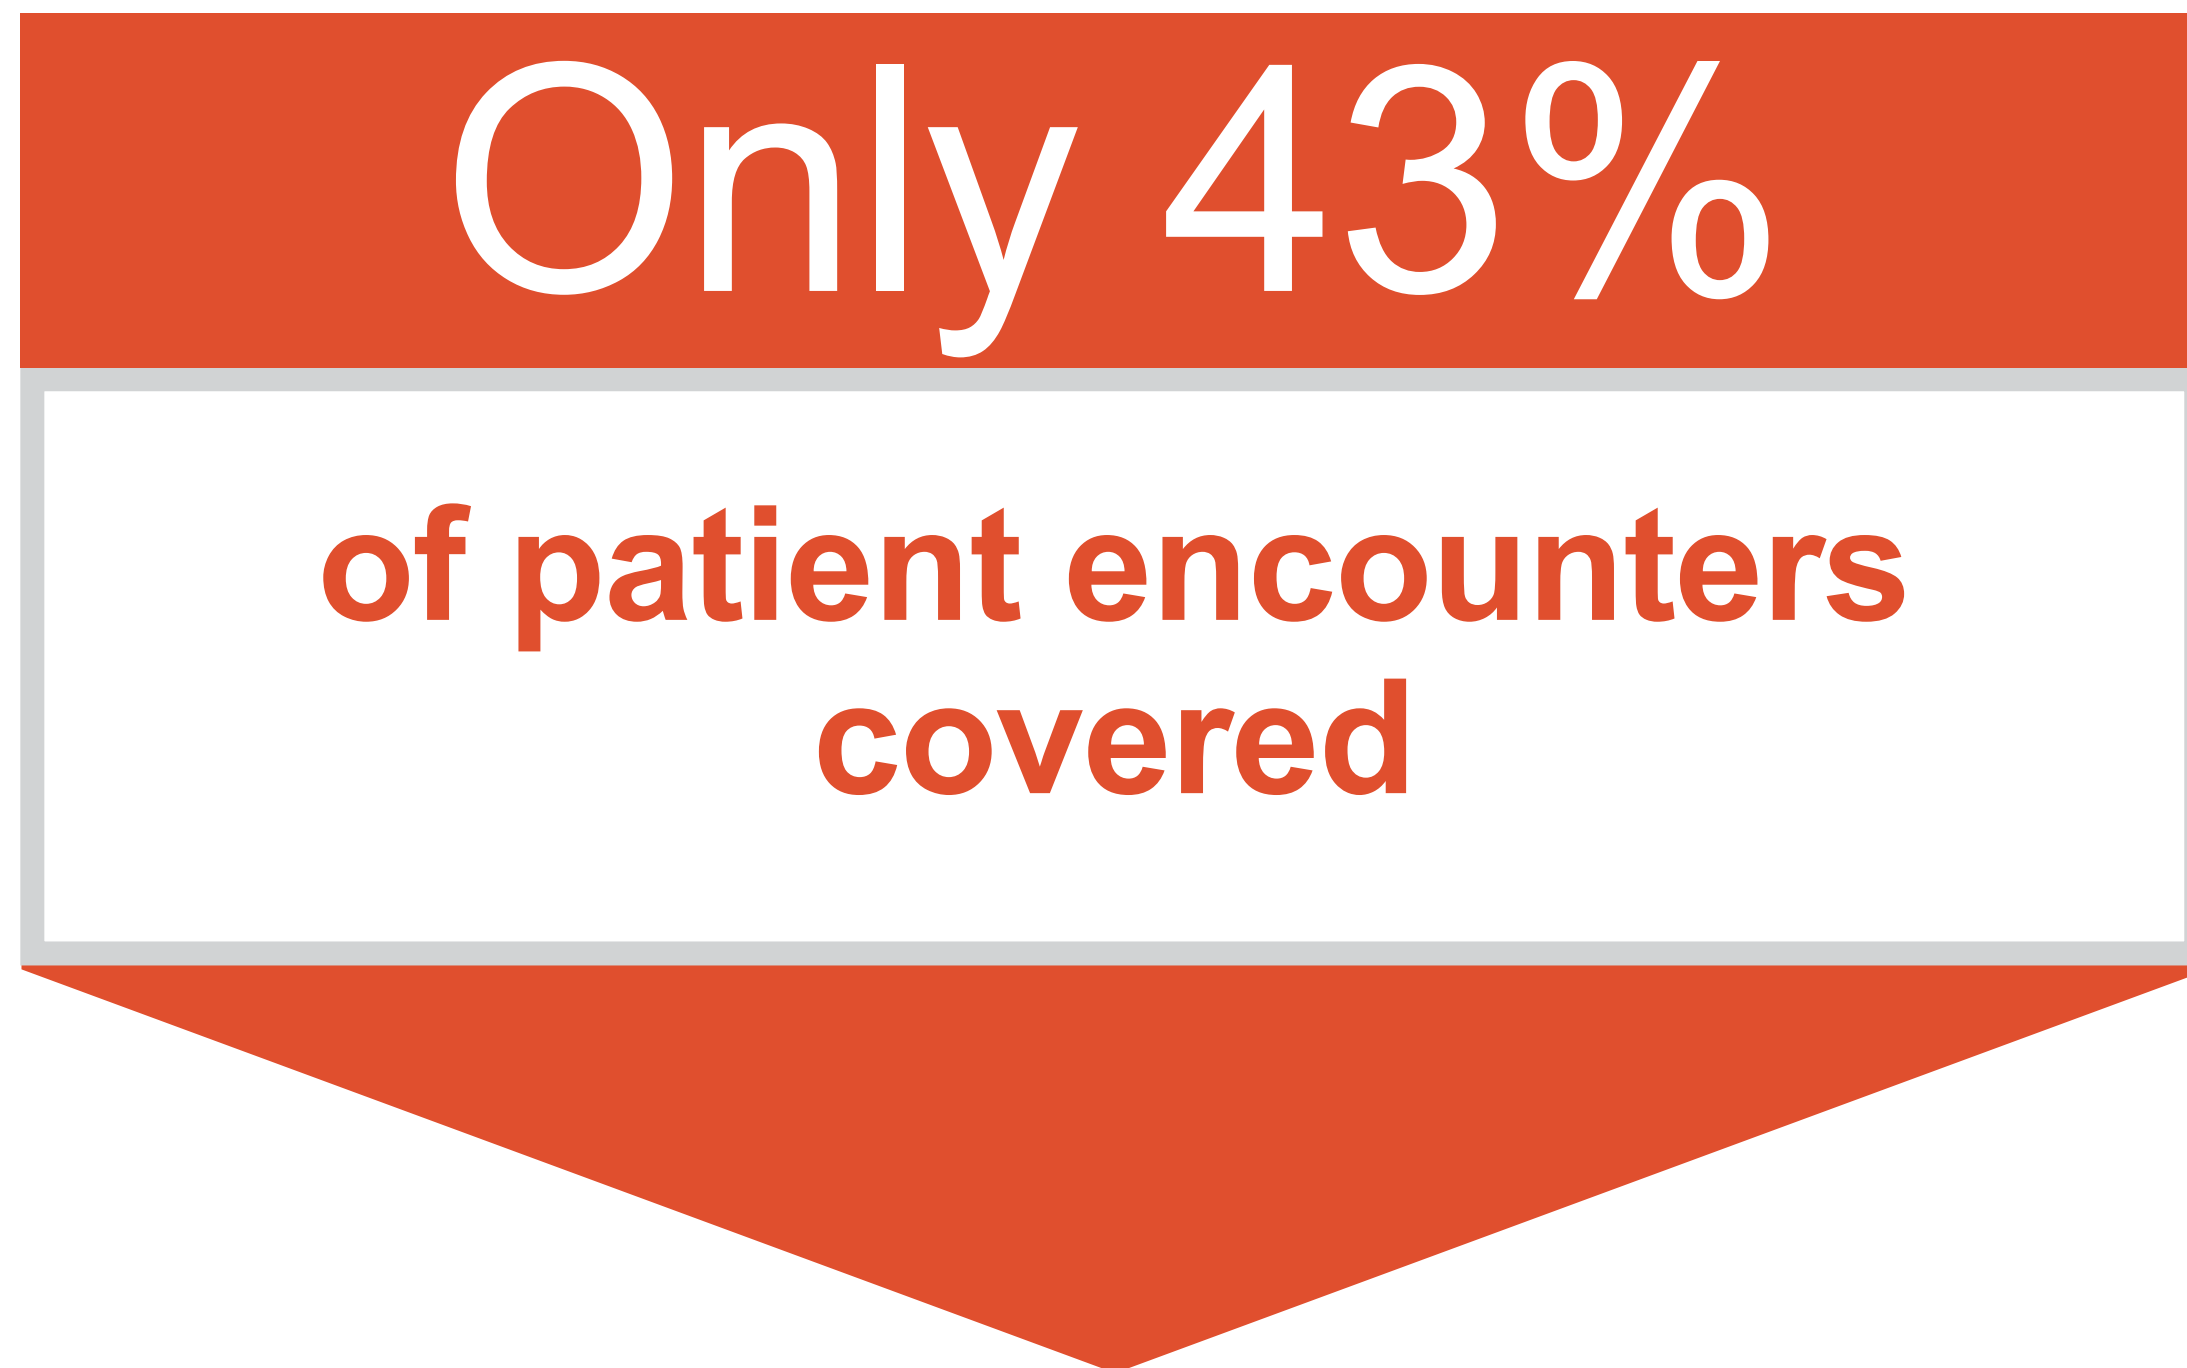

Few CDI programs look at **ALL** payers.

Sample payer mix for CDI opportunities*

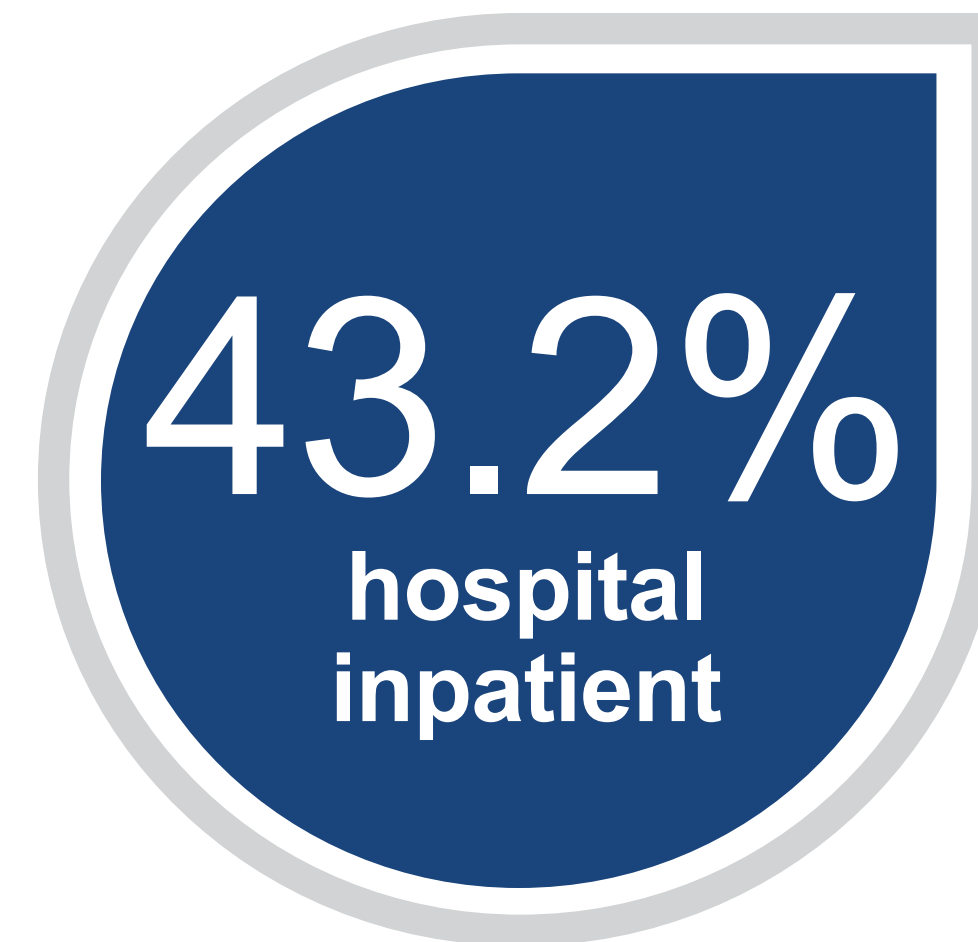

Most CDI programs focus only on **inpatient visits**.

CDI: Inpatient vs. outpatient*

More than 89%

of cases ignored

Total reach of present-state
CDI programs*

10.1%

CDI
reviewed

89.9%

Not
reviewed

To capture the full opportunity, a physician-driven CDI program must address:

All lengths of stay

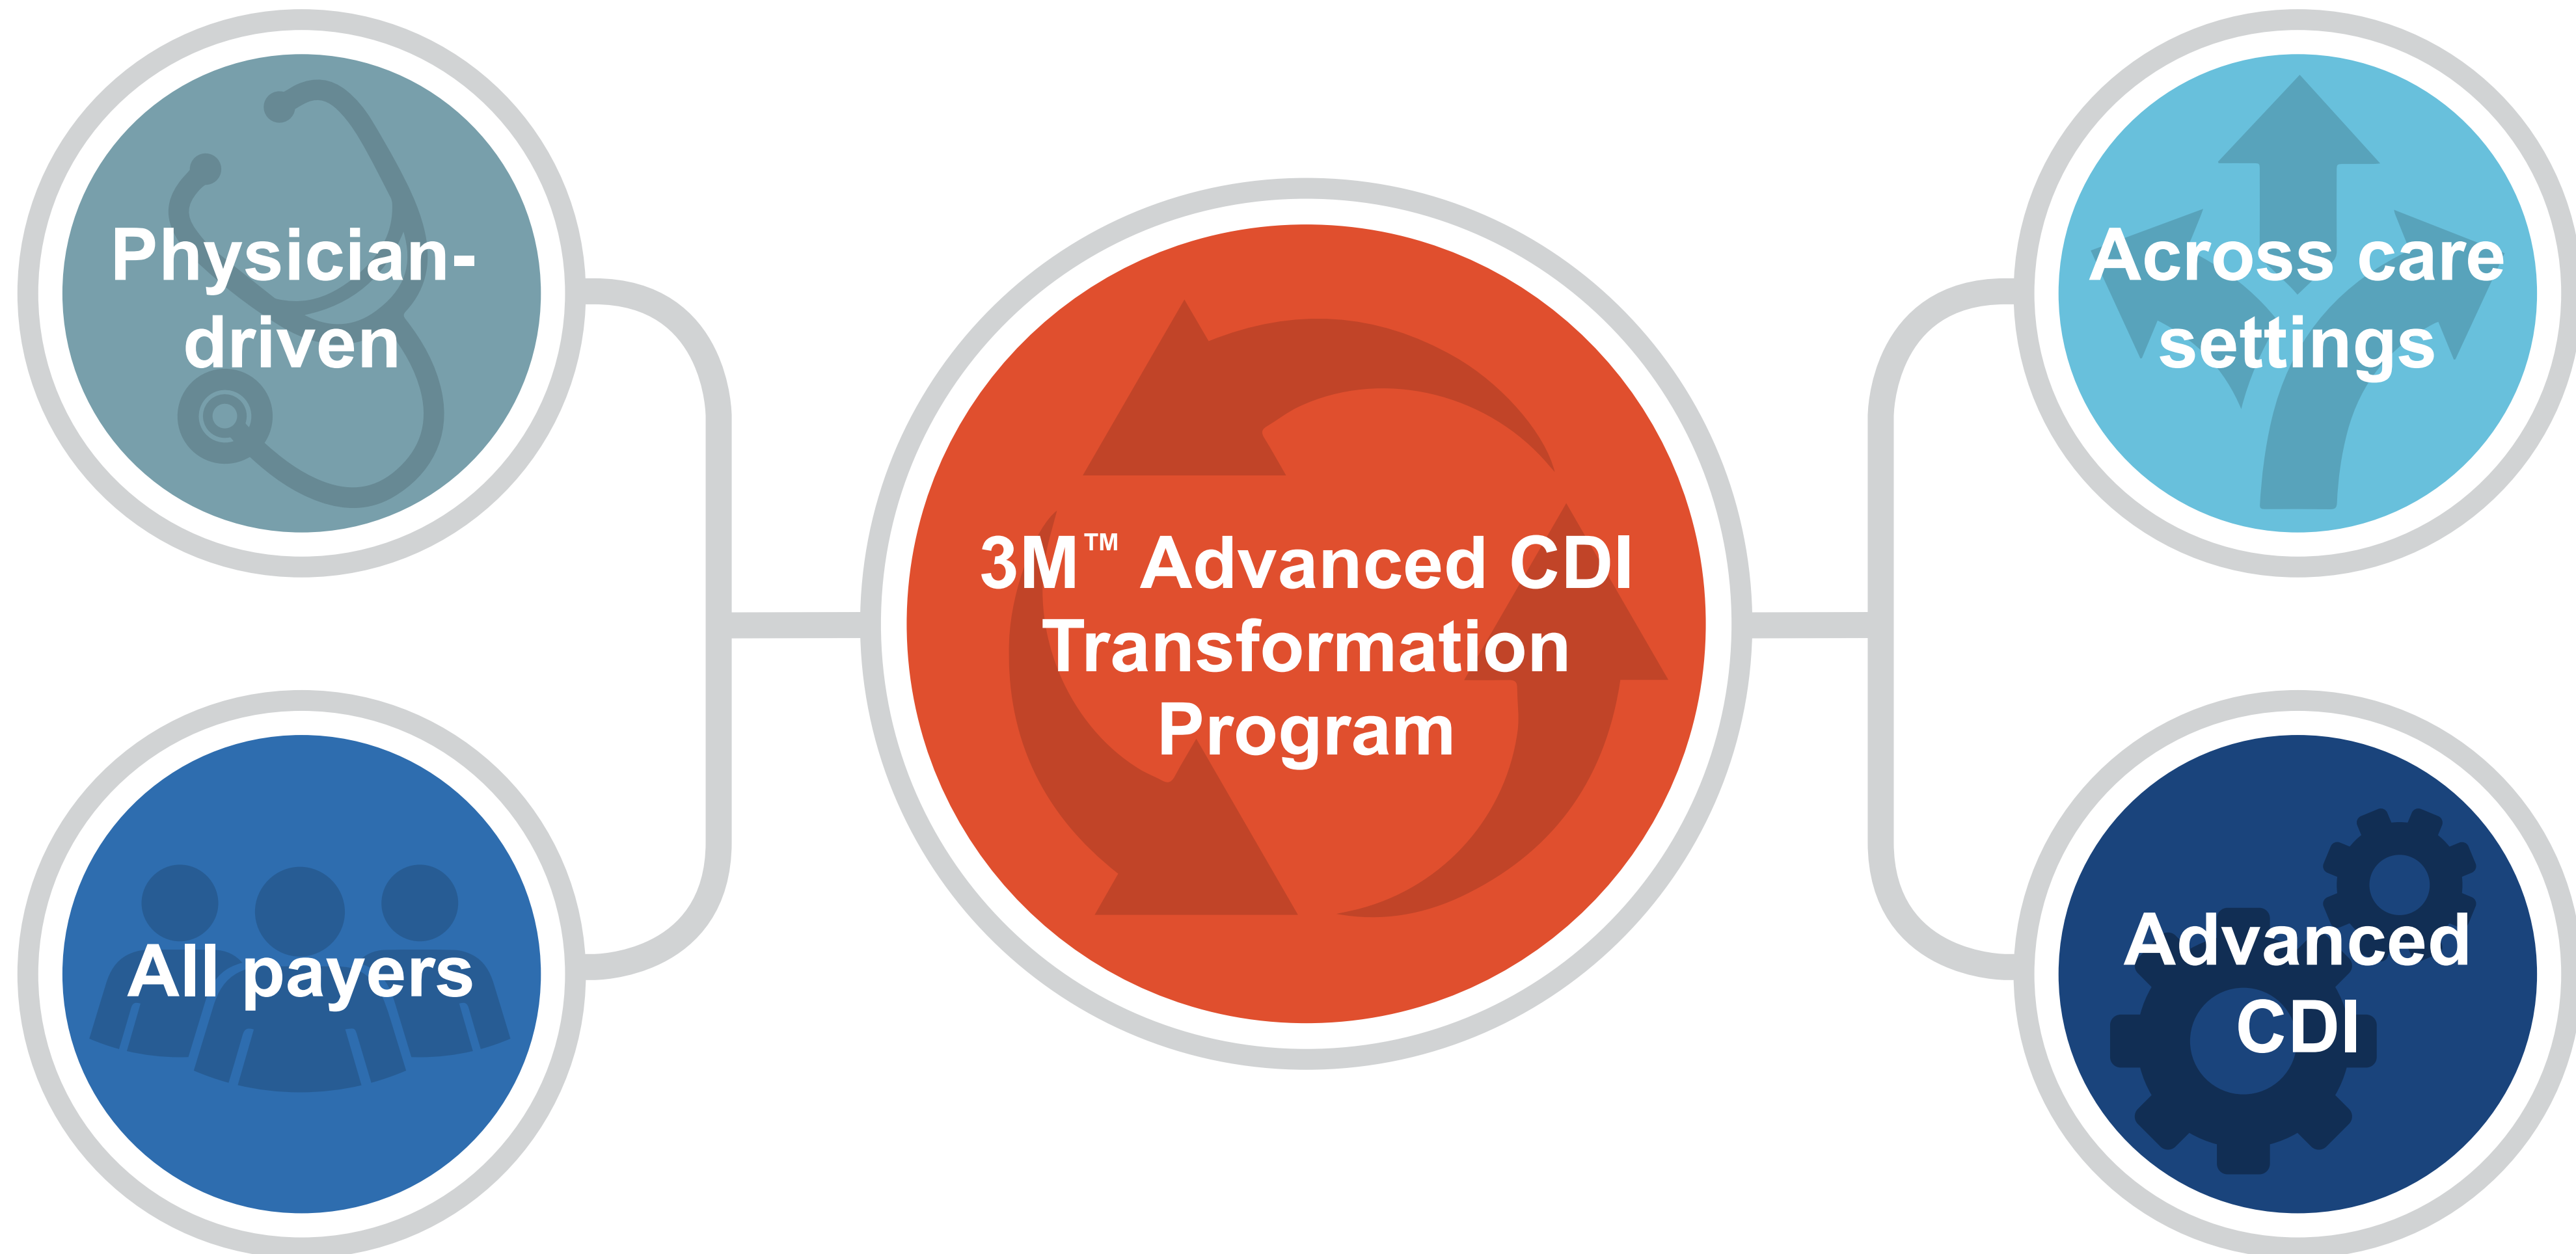

All payers

Across care settings
