

3M™ Tegaderm™ I.V. Port Dressings

Tough Treatments Made Easier

Oncology patients are vulnerable—and in the fight against infection, the dressing you use really matters. Tegaderm™ I.V. Port Dressings are specifically designed for implanted venous ports, offering both antimicrobial protection and the comfort your patients deserve.

3M™ Tegaderm™ I.V. Port Dressings

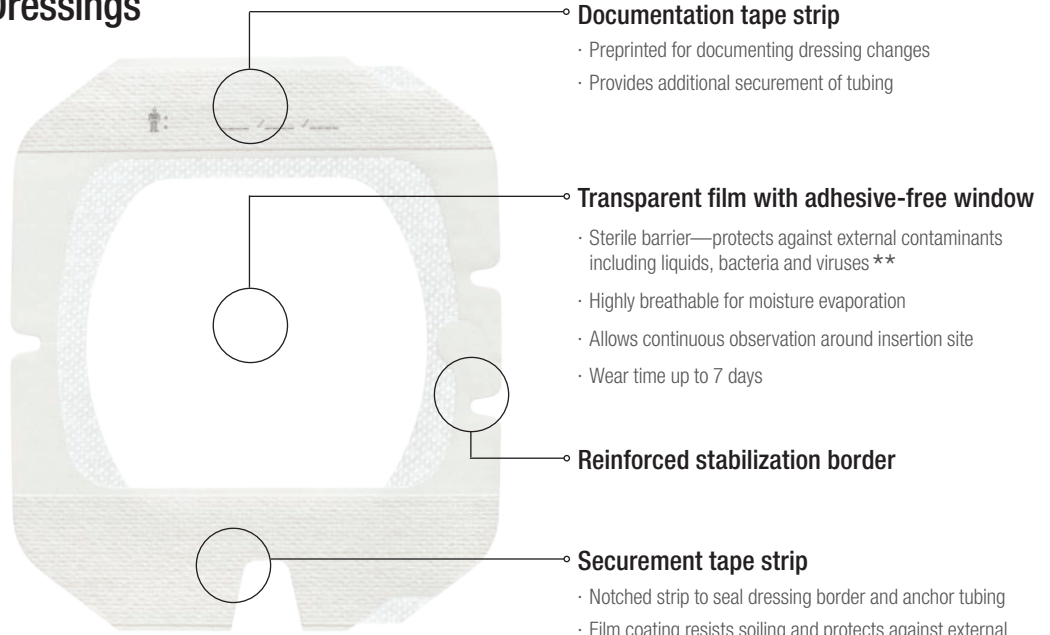

Patient Comfort: Adhesive-free window minimizes adhesive contact with patient skin

Antimicrobial Protection: CHG gel pad provides immediate and continuous antimicrobial protection*^{1,2}

Patient and Clinician Safety: Adhesive-free window reduces risk of dressing sticking to needle during removal

Gentle and Strong: Flexes with patient movement and can be worn up to 7 days

Easy Monitoring: Transparent dressing and CHG gel pad permit clear visibility around the needle insertion site

Accommodates a variety of non-coring Huber needles.

- Chlorhexidine gluconate (CHG) gel pad***
 - Provides immediate and continuous protection against microorganisms associated with CRBSIs^{1,2}
 - Designed to conform around the needle—stays in place and in contact with skin
 - Remains clear and protects even in the presence of blood, saline and exudates

* Available with 3M™ Tegaderm™ CHG Chlorhexidine Gluconate I.V. Port Dressing

** *In vitro* testing shows that the transparent film provides a viral barrier from viruses 27 nm in diameter or larger while the dressing remains intact without leakage.
