

Questions and Answers	
<b>1</b>	<p><b>Do I need special sandpaper?</b></p> <p>No. You don't need special sandpaper, but you do need dedicated sandpaper to avoid cross-contamination between steel and aluminum surfaces. Commonly accepted repair practices for steel repairs will translate to aluminum specific repairs. Traditional 3M Abrasives are well suited for aluminum repairs, but abrasives and tools previously used on steel must be kept away from aluminum repair areas and vice versa.</p>
<b>2</b>	<p><b>What adhesives do we use?</b></p> <p>Commonly accepted repair practices and products for steel repairs will translate to aluminum specific repairs. 3M Adhesives will work on aluminum, but it's always a good idea to follow OEM repair recommendations for preferred products and processes.</p>
<b>3</b>	<p><b>What seam sealers are best?</b></p> <p>Commonly accepted repair practices and products for steel repairs will translate to aluminum specific repairs.</p>
<b>4</b>	<p><b>Are the 3M body fillers and glazes going to stick?</b></p> <p>Yes. 3M premium body fillers and glazes are applicable to aluminum repairs.</p>
<b>5</b>	<p><b>Do I need to take special care to help maintain proper air quality within the work area?</b></p> <p>Yes. Follow all OSHA guidelines and use approved vacuum system for your specific requirements when repairing aluminum.</p>
<b>6</b>	<p><b>How long can bare aluminum be exposed before corrosion begins?</b></p> <p>Oxidation will begin once aluminum is exposed to atmosphere. Oxidation should be removed throughout the repair by re-abrading and cleaning the surface after each hour of exposure.</p>
<b>7</b>	<p><b>Do 3M panel bonding adhesives still retain lifetime warranties with aluminum?</b></p> <p>Yes, provided all proper procedures are followed.</p>
<b>8</b>	<p><b>Do I need special air tools?</b></p> <p>It is highly recommended to use separate air tools dedicated to aluminum repairs OR tools that have been thoroughly cleaned with compressed air to remove any steel particles. Use caution not to cross contaminate work surfaces.</p>
<b>9</b>	<p><b>Do I need special tools or clamps?</b></p> <p>Yes. Use separate hand tools designed for aluminum repairs (e.g., hammers, dollies, clamps, files, drill bits, saw blades, etc.). These tools are usually either non-metallic, or have a highly polished surface to ensure that steel particles will not transfer while being used.</p>
<b>10</b>	<p><b>What aluminum welder do you recommend?</b></p> <p>Welder technology has improved greatly in the last few years for aluminum. There are many great models, but it's best that you explore models that meet OEM recommendations for the types of vehicles that you work on.</p>
<b>11</b>	<p><b>Can 3M coatings be applied direct to aluminum (e.g., 3M™ No Cleanup Rocker Gard™ Coating, undercoating, etc.)?</b></p> <p>Commonly accepted repair practices and products for steel repairs will translate to aluminum specific repairs. Direct to metal coatings may be applied as such.</p>
<b>12</b>	<p><b>Can I use the same piece of abrasive on steel and aluminum substrates?</b></p> <p>No. It is very important to use a new piece of abrasive and thoroughly clean tools or use separate tools when going between work surfaces to avoid cross contamination of work surfaces. Contamination of one substrate from another causes galvanic corrosion and will eventually lead to paint failure.</p>

## Individual Product Instruction and Safety Information

For individual product instructions and applicable precautions see product labels and associated literature for the individual product at [3MCollision.com](http://3MCollision.com)

For product material safety data sheets see [3MCollision.com](http://3MCollision.com)

**Technical Information:** The technical information, guidance, and other statements contained in this document or otherwise provided by 3M are based upon records, tests, or experience that 3M believes to be reliable, but the accuracy, completeness, and representative nature of such information is not guaranteed. Such information is intended for people with knowledge and technical skills sufficient to assess and apply their own informed judgment to the information. No license under any 3M or third party intellectual property rights is granted or implied with this information.

**Product Selection and Use:** Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. As a result, customer is solely responsible for evaluating the product and determining whether it is appropriate and suitable for customer's application, including conducting a workplace hazard assessment and reviewing all applicable regulations and standards (e.g., OSHA, ANSI, etc.). Failure to properly evaluate, select, and use a 3M product and appropriate safety products, or to meet all applicable safety regulations, may result in injury, sickness, death, and/or harm to property.

**Warranty, Limited Remedy, and Disclaimer:** Unless a different warranty is specifically stated on the applicable 3M product packaging or product literature (in which case such warranty governs), 3M warrants that each 3M product meets the applicable 3M product specification at the time 3M ships the product. 3M MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ARISING OUT OF A COURSE OF DEALING, CUSTOM, OR USAGE OF TRADE. If a 3M product does not conform to this warranty, then the sole and exclusive remedy is, at 3M's option, replacement of the 3M product or refund of the purchase price.

**Limitation of Liability:** Except for the limited remedy stated above, and except to the extent prohibited by law, 3M will not be liable for any loss or damage arising from or related to the 3M product, whether direct, indirect, special, incidental, or consequential (including, but not limited to, lost profits or business opportunity), regardless of the legal or equitable theory asserted, including, but not limited to, warranty, contract, negligence, or strict liability.
