Venous Leg Ulcers

Simplify your wound care journey
with 3M products

Venous leg ulcers are associated with a variety of conditions, including low to high amounts of wound exudate, microbial bioburden, the potential for peri-wound maceration and edema. Using the **Clean-Protect-Fill-Cover-Compress** approach to wound care, 3M can help you manage all of these challenges to help achieve better care, better outcomes, and better value.

1. Clean

Clean the wound thoroughly according to your facility's protocol.

2. Protect

Protect periwound skin and wound edges from maceration.

3. Fill

Antimicrobial – Reduce and control bioburden in a wound that shows signs of infection.

Low exudate

Absorbent – Manage wound drainage and fill wound depth.

High exudate

4. Cover

Cover the wound to manage wound exudate, protect from contamination and provide a moist wound healing environment.

5. Compress

Manage edema with effective compression.

Ordering Information

3M™ Cavilon™ No Sting Barrier Film

PROTECT

Cat. No.	Size	Items/Box	Boxes/Case
3343E	1.0 ml wand	25	4
3344E	1.0 ml peel-open wipe	30	6
