

Capacitación de SAP Source To Pay

## STP359: Inventario de Red de Suministro en SNC

#### Capacitación para el usuario externo

Versión: 5.0 Última actualización: 07-Nov-2017

> 3M Business Transformation & Information Technology Progress set in motion >

Este curso describe el proceso de Inventario de red de suministro (Supply Network Inventory, SNI) dentro de la Colaboración de la red de suministro (Supply Network Collaboration, SNC), cómo monitorear el inventario del proveedor, administrar alertas, y cómo ingresar datos de stock y ratios.

Luego de completar este curso, usted podrá hacer lo siguiente:

- Describir el proceso del Inventario de Red de Suministro en SNC.
- Monitorear inventario de la cadena de suministro utilizando el SNI.
- Reconocer los pasos para suministrar datos de stock y ratios a SNI.
- Comparar los datos de stock y ratio históricos.

# Colaboración de la red de suministro

Luego de completar este módulo, usted podrá:

- Explicar qué procesos comerciales se integran a su trabajo con 3M utilizando SNC.
- Iniciar sesión en SNC.

### Introducción a la Colaboración de la red de suministro (SNC)

3M implementó SAP como su sistema de Planificación de recursos empresariales (Enterprise Resource Planning, ERP) para respaldar los procesos de extremo a extremo.

- El software SAP permite una mejor experiencia del Proveedor. Vincula procesos comerciales, personas e información con una plataforma global y perfectamente integrada de procesos comerciales estandarizados.
- Como parte de esta implementación, las Operaciones de abastecimiento de 3M usan SNC de SAP como una herramienta para mejorar las comunicaciones y la productividad, tanto de 3M como de nuestros Proveedores clave.
- Usted accede al portal de SNC a través de Supplier Direct de 3M.

#### Introducción a la Colaboración de la red de suministro (continuación)

3M desea:

- Compartir más información con nuestros Proveedores clave.
- Que los Proveedores clave asuman una mayor responsabilidad y trabajen proactivamente como socios comerciales.

SNC es un componente basado en la web dentro del grupo de Gestión de la cadena de suministro de SAP que:

- Brinda soporte a la colaboración entre proveedores y clientes. 3M usa principalmente SNC con los proveedores que no utilizan transacciones operacionales ni comparten datos electrónicamente.
- Mejora la eficiencia del proceso. SNC ayuda tanto a 3M como a nuestros Proveedores a ahorrar en costos y tiempo.

## Introducción a la SNC

SNC ofrece una plataforma basada en la web para la colaboración en tiempo real con socios comerciales internos y externos.

Kanban

### Estrategias de SNC

Los Proveedores colaboran con 3M para los siguientes procesos:

#### Estrategias de SNC (continuación)

Colaboración con la orden de compra de SNC

- Mantiene al tanto a 3M y a los Proveedores sobre el cumplimiento de la PO y las órdenes de entrega para las PO.
- Les permite a los Proveedores responder a los requisitos de manera rápida y precisa.

Colaboración en el proceso de liberación de SNC

- Facilita la ejecución precisa y en tiempo real entre 3M y nuestros Proveedores; mantiene al Proveedor actualizado sobre:
  - Planes de entregas (Scheduling Agreement o SA)
  - Órdenes de entrega (Delivery Schedules)
  - Cantidades acumuladas recibidas
  - Cualquier excepción

#### Estrategias de SNC (continuación)

Colaboración de la demanda de SNC

Al usar OFM en SNC, se habilita la Colaboración de la demanda entre los datos de planificación de 3M y los Proveedores.

- Compara los datos en un entorno de una única ventana.
- Las desviaciones entre el plan de 3M y el plan del Proveedor se muestran como números absolutos, porcentajes y códigos de colores.
- OFM ofrece alertas a todas las partes, de modo que puedan adaptar rápidamente la planificación y la capacidad de entrega para mitigar las situaciones críticas.

Notificación previa de embarque (ASN)

- Permite a los Proveedores brindarle a 3M detalles de un envío por medio de SNC, con antelación, al momento de o cuando se realice el envío.
- Comunica la información de envío, los detalles del vehículo, el transportista y los detalles de contacto de 3M en tiempo real.

Colaboración de inventario de SNC

- Permite la adopción de diferentes estrategias de gestión de inventario para un flujo más parejo de inventario desde un Proveedor al taller. Esto incluye ofrecer logística tercerizada (3PL), que almacena el inventario del Proveedor, con la capacidad de enviar los datos de ASN a 3M para el Proveedor.
- Los beneficios de la Colaboración de inventario son:
  - Reabastecimiento rápido del inventario.
  - Ayuda con la planificación de varias entregas en el horizonte de planificación.
  - Mayor visibilidad de la demanda.

#### Estrategias de SNC (continuación)

Colaboración en Subcontratación

- Le permite a 3M liberar PO para Subcontratistas en SAP y comunicarlas a los Subcontratistas mediante SNC.
- Este proceso:
  - Mantiene a 3M y a los subcontratistas al tanto del cumplimiento de PO y de los programas de entrega.
  - Les permite a Subcontratistas responder a los requisitos de manera rápida y precisa.

Inventario de la red de suministro

- Complementa la colaboración de subcontratación.
- Da soporte a clientes, subcontratistas y proveedores del primer nivel y superior (proveedores del proveedor) y a otros socios para el monitoreo de niveles de existencia y requisitos de productos en ubicaciones determinadas de la cadena de suministro.

| Colaboración de |  |
|-----------------|--|
| facturación     |  |

Le permite a un Proveedor crear facturas para las mercancías que proporcionó el Proveedor a 3M.

Inventario manejado por el proveedor (SMI) Un proceso que permite que los Proveedores de una compañía gestionen la ejecución y la planificación de solicitudes brutas. El cliente (3M) ya no deberá realizar la MRP.

Kanban

Permite que los Proveedores de 3M revisen las Órdenes de compra y creen los Avisos previos de embarque.

Con SNC, los Proveedores pueden:

- Acceder a la PO de 3M, a la PO de subcontratación, a los Planes de entregas, a la Orden de entrega y a los datos de Liberación.
- Proporcionar a 3M confirmación de PO, confirmación de la Orden de entrega y los datos de la ASN, ya sea en línea o utilizando un proceso de carga de archivos.
- Acceder y descargar la planificación, la demanda y los datos del pronóstico de 3M.
- Cargar los datos de producción planificados.
- Crear y publicar las facturas y ver el status de pago de las facturas.

Acceda a la *página de acceso global de Supplier Direct de* 3M escribiendo <u>3M.com/supplierdirect</u> en la barra de direcciones de su explorador web.

Bajo Seleccione la ubicación directa de su proveedor de 3M (Select Your 3M Supplier Direct Location), seleccione su **ubicación** de la lista.

#### Inicio de sesión en SNC (continuación)

En la página de inicio del sitio web Supplier Direct de 3M de la ubicación seleccionada, haga clic en **Iniciar sesión** (Please Sign In) (o en el ícono de la persona) en la parte superior derecha del sitio web Supplier Direct.

En la ventana Acceso a la Red de Empresa, ingrese su **Código de Usuario** (Username) y **Palabra Clave** (Password) y haga clic en **Acceder** (Login).

#### Inicio de sesión en SNC (continuación)

Para acceder a SNC, haga clic en el vínculo **3M ERP** debajo de la sección Vínculos rápidos (Quick Links) en la parte derecha de la página.

Nota: También puede encontrar el vínculo de **3M ERP** en la página **Transacciones** Source to Pay (Source to Pay Transactions) en la pestaña *Proveedores* (Suppliers).

El Portal de ERP se abre en una nueva ventana del explorador.

Debajo de la pestaña *Proveedor* (Supplier), luego, en la pestaña *Comunicación de red de proveedores* (Supplier Network Communication), se muestra la página por defecto *Monitor de alertas* (Alert Monitor).

Los puntos clave que se cubrieron en este módulo son los siguientes:

- 3M les proporciona a los Proveedores una herramienta en la web denominada Colaboración de la red de suministro (SNC).
- Accede a SNC a través del portal Supplier Direct de 3M.
- Los Proveedores colaboran con 3M para estos procesos:
  - Colaboración con la orden de compra
  - Colaboración en el proceso de liberación
  - Colaboración de la demanda usando OFM
  - Notificación previa de embarque
  - Colaboración de inventario
  - Colaboración en Subcontratación
  - Colaboración de facturación

## Introducción a Inventario de Red de Suministro

#### Objetivos del módulo

Luego de completar este módulo, usted podrá:

- Describir el propósito de usar el SNI.
- Enumerar los beneficios de usar el SNI.
- Describir el flujo de proceso de SNI.
- Identificar los tipos de datos que pueden visualizarse en SNI.
- Identificar los productos que pueden monitorearse utilizando el SNI.

Inventario de Red de Suministro (SNI) es un subproceso SNC.

- El principal objetivo de SNI es monitorear las posiciones de stock de uno o más materiales en toda la cadena de suministro dentro de un ciclo de planificación completo.
- SNI admite el monitoreo de las posiciones de stock en varias ubicaciones en la cadena de suministro, que incluye:
  - Localidades de 3M
  - Clientes
  - Subcontratistas
  - Proveedores
  - Proveedores del proveedor
  - Proveedores Logísticos Terceros

#### Inventario de Red de Suministro (continuación)

Una cadena de suministro con un inventario que puede monitorearse en SNI:

SNI con SNC:

- Mejora las rotaciones de inventario y reduce el inventario parado.
- Permite una planificación y cumplimiento más precisos con todos los socios comerciales.

Los productos que pueden monitorearse con el SNI son los siguientes:

- Productos 3M
- Productos 3M que se almacenan y a los que se les realiza el procesamiento posterior en la ubicación del Proveedor
- Productos del Proveedor (solamente componentes de suma importancia)
- Productos almacenados por otro socio comercial (como un Proveedor Logístico Tercero [3PL] o un Proveedor del proveedor)

3M y los socios comerciales:

Extraen información de stock del sistema backend de SAP de 3M y se envía a SNC.

Buscan excepciones de inventario en SNI.

Revisar la situación de inventario en la ventana Descripción general de SNI (SNI Overview).

Revisar el status de stock proyectado en la ventana Detalles de SNI (SNI Details).

Revisar el inventario actual en la ventana Descripción general de inventario (Inventory Overview).

Analizar el historial de ratios en la ventana *Comparación de historial en SNI* (SNI History Comparison).

Mantienen alertas de SNI personalizadas (usuario de 3M solamente).

Los puntos clave que se cubrieron en este módulo son los siguientes:

- SNI soporta a todos los Socios Comerciales a lo largo de la cadena de suministro, en el monitoreo de las posiciones de inventario en toda la cadena dentro de un ciclo de planificación.
- SNI ofrece una visualización orientada a períodos y basada en series cronológicas de demandas, entradas e inventarios de los componentes en las ubicaciones del socio comercial.

## Monitoreo de Inventario en la Cadena de Suministro y Figuras Claves

#### Objetivos del módulo

Luego de completar este módulo, usted podrá:

- Revisar alertas de SNI.
- Revisar el status de SNI.
- Revisar el status de stock proyectado.
- Revisar una instantánea del inventario actual.

#### Verificación de excepciones de inventario en SNI

Las alertas se activan para cualquier actualización de los ratios en SNI. Cualquier situación de excepción genera alertas. Las alertas se transmiten a 3M y al proveedor. Las alertas de SNI incluyen las siguientes:

- Por debajo del mínimo: stock proyectado (SNI)
- Por encima del máximo: stock proyectado (SNI)
- Sin stock: stock proyectado (SNI)
- Por debajo del mínimo: stock disponible (SNI)
- Por encima del máximo: stock disponible (SNI)
- Sin stock: stock disponible (SNI)
- Alerta SNI: Las condiciones de alerta se dan para una Alerta SNI personalizada

#### Verificación de Excepciones de Inventario en SNI (continuación)

Para revisar excepciones individuales en el Monitor de alertas (Alert Monitor), el Proveedor hace clic en los **hipervínculos** de alerta individuales:

| 100.000 (00.000)  |                  |              |                       |                    |             |           |         |                       |                        |              |       |             |           |                        |                     |

Las instrucciones detalladas sobre cómo **revisar las excepciones SNI** se pueden encontrar en el sitio <u>Supply Network Collaboration Training</u>.

La ventana *Descripción general de SNI* (SNI Overview) le permite verificar el resumen del stock disponible de todas las ubicaciones de 3M.

Las posiciones de stock están resaltadas con códigos de colores diferentes. Esto indica distintas situaciones de stock:

- Rojo: el stock proyectado es cero o está por debajo de cero.
- Amarillo: el stock proyectado está por debajo del nivel mínimo de stock (stock de seguridad).
- Azul: el stock proyectado supera el nivel máximo de stock.
- Verde: el stock proyectado está entre los niveles de stock mínimo y máximo.

#### Revisar status de inventario (continuación)

Para revisar el status de inventario, de la lista desplegable *SNI*, el Proveedor selecciona **Descripción general de SNI** (SNI Overview):

#### Revisar status de inventario (continuación)

La ventana *Descripción general de SNI* (SNI Overview) brinda información de inventario según el producto por ubicación:

- Stock disponible actual
- Cantidad de alertas de SNI personalizadas mantenidas y status de las alertas
- Status de stock proyectado de diez buckets de tiempo (TB) relativos y futuros. Los buckets se definen utilizando el Modelo de buckets de tiempo (días, semanas o meses, incluidas las combinaciones).
  - El Modelo de buckets de tiempo determina el objetivo de planificación y la división en períodos para el producto de una ubicación en el Monitor de SNI.

Las instrucciones detalladas sobre cómo **revisar las posiciones de inventario** se pueden encontrar en el sitio <u>Supply Network Collaboration Training</u>.

El proveedor revisa el status de stock proyectado en dos ventanas:

- La ventana Detalles de SNI (SNI Details)
- La ventana Detalles de SNI: vista de producto (SNI Details Product View)

El Proveedor puede revisar el status de stock proyectado en las ventanas *Detalles de SNI* (SNI Details) y *Detalles de SNI – vista de producto* (SNI Details – Product View). Para revisar el status de stock proyectado:

1. De la lista desplegable *SNI*, seleccione **Detalles de SNI** (SNI Details).

Por un período determinado, la ventana Detalles de SNI (SNI Details) muestra:

**Demanda** (Demand): SNI considera varios tipos de demandas del producto de salida cuando calcula el stock proyectado. El Ratio de demanda (Demand Key Figure) es la suma de Demanda en firme (Firm Demand), Demanda planificada (Planned Demand) y Pronóstico (Forecast).

**Stock proyectado** (Projected Stock): El valor calculado que representa el stock que se prevé que estará disponible en una ubicación al finalizar un bucket de tiempo. Para un bucket de tiempo dado, este equivale al stock proyectado del Bucket de tiempo anterior + Entradas en firme + Entradas planificadas + Cantidad en tránsito – Demanda – Reservas de subcontratación.

En la pestaña *Gráfico* (Graphic), el Proveedor puede visualizar la posición de stock del producto en un gráfico.

Los modelos de buckets de tiempo determinan el objetivo de planificación y la división en períodos para un producto por ubicación en las ventanas *Detalles de SNI* (SNI Details) y *Descripción general* (Overview). El modelo de buckets de tiempo:

- Se mantiene en los niveles de Ubicación o Producto por ubicación.
- Las opciones de división por períodos incluye lo siguiente:
  - Cantidad de años en un objetivo a largo plazo en meses.
  - Cantidad de meses en un objetivo a mediano plazo en semanas.
  - Cantidad de semanas en un objetivo a corto plazo en días.
- La división por períodos puede incluir una combinación de días, semanas y meses.
- Offset inicial puede utilizarse para mover el inicio del objetivo a una cantidad de días en el pasado o en el futuro.

## Mantener el modelo de buckets de tiempo (continuación)

Para mantener el modelo de buckets de tiempo:

1. De la lista desplegable *SNI*, seleccione Modelo de buckets de tiempo (SNI) (Time Buckets Profile [SNI]).

La *Introducción a inventario* (Inventory Overview) proporciona una visualización del stock disponible de los productos por ubicación seleccionados:

- Se visualiza el stock del socio proveedor de datos para discernir los datos de inventario que fueron suministrados por varios socios comerciales.
- Incluye información de inventario por lote.

Para revisar la Introducción a inventario:

1. De la lista desplegable *SNI*, seleccione **Introducción a inventario** (Inventory Overview).

Los puntos clave que se cubrieron en este módulo son los siguientes:

- Las alertas se activan para cualquier actualización de los ratios en SNI. Cualquier situación de excepción genera alertas. Las alertas se transmiten a 3M y al Proveedor.
- El Proveedor revisa el status de stock proyectado en las ventanas Detalles de SNI (SNI Details) y Detalles de SNI – vista de producto (SNI Details – Product View).
- La ventana Introducción a inventario (Inventory Overview) proporciona una visualización del stock disponible de los productos por ubicación seleccionados.
- La ventana Descripción general de SNI (SNI Overview) brinda información de inventario según el producto por ubicación.
- Los Modelos de buckets de tiempo (Time Buckets Profiles) cambian el objetivo de planificación y la división en períodos en las ventanas *Detalles de SNI* (SNI Details), *Detalles de SNI – vista de producto* (SNI Details – Product View) y *Descripción general de SNI* (SNI Overview).

# Socio externo: ingreso de datos de stock y ratios

# Objetivos del módulo

Luego de completar este módulo, usted podrá explicar los pasos que ejecuta el proveedor para ingresar los datos de stock y ratios.

# Métodos para que los proveedores suministren datos a SNI

El proveedor necesita suministrar datos a SNC para que SNI funcione correctamente. El proveedor puede realizar lo siguiente:

- Enviar datos utilizando Mensajería automática.
- Ingresar los datos directamente en las ventanas Detalles de SNI (SNI Details) y Detalles de SNI – vista de producto (SNI Details – Product View).
- Enviar datos utilizando el Método de transferencia de archivos.

# Transferencia de datos a través del Método de mensajería automática

Los proveedores que tengan la versión de SAP 6.02 (y superior) pueden transferir datos a SNC automáticamente. El proveedor debe hacer lo siguiente:

- Generar informes como estos: ROEMPROACT2, RCMPROACT2 y RPRTPROACT.
- Enviar el informe a SNC.

**Nota**: Esta opción requiere la configuración y la puesta a prueba por parte de 3M. Para habilitar esta tecnología, el proveedor necesita comunicarse con 3M.

# Transferencia de datos por el Método de transferencia de archivos

Para transferir datos a SNC sin conexión, los proveedores que no cuentan con SAP pueden utilizar el Método de transferencia de archivos (File Transfer Method). El proveedor debe hacer lo siguiente:

- Crear modelos en SNC para descargar y cargar archivos.
- Descargar el archivo de datos utilizando el Centro de descarga de SNC.
- Suministrar todos los detalles relevantes.
- Guardar el archivo en formato .CSV.
- Cargar el archivo .CSV en SNC utilizando el Centro de carga de SNC.

# Entrada de datos por parte del proveedor en SNI Details

En el monitor de SNI, los proveedores editan manualmente los Datos de stock (Stock Data) y otra información clave. El ingreso de datos se completa a través de dos ventanas del monitor de SNI:

- Detalles de SNI (SNI Details): El proveedor puede cambiar distintos datos como necesidades, entradas y stock de una o más ubicaciones.
- SNI Details vista de producto (SNI Details Product View): Ofrece una visualización detallada de los Datos de stock (Stock Data) y Ratios (Key Figures) correspondientes a un producto de sola ubicación en formato de tabla y de gráfico.

#### Entrada de datos por parte del proveedor en Detalles de SNI (SNI Details) (continuación)

Los datos pueden ingresarse en varias disposiciones de cuadrícula:

- Editar detalles por Ubicación asignada y Proveedor de datos (Edit Details by Assigned Location and Data Provider): los ratios (Key Figures) pueden mantenerse a nivel de Ubicación (Location), Producto (Product) y Proveedor de datos (Data provider).
- Editar detalles por Proveedor, Ubicación de origen y Proveedor de datos (Edit Details by Supplier/Ship-from Location and Data Provider): los Ratios (Key Figures) pueden mantenerse a nivel de Ubicación (Location), Producto (Product), Proveedor de datos (Data provider) y Proveedor/Origen (Supplier/Ship-from).
- Editar todo (Edit All): los Ratios (Key Figures) pueden mantenerse a nivel de mayor detalle en SNI, como de Producto (Product), Ubicación (Location), Proveedor de datos (Data provider), Ubicación asignada (Assigned location), Proveedor (Supplier) y Ubicación de origen (Ship-from location).

# Editar datos en la ventana SNI Details

En la ventana Detalles de SNI (SNI Details), para modificar datos de SNI:

1. De la lista desplegable *SNI*, seleccione **Detalles de SNI** (SNI Details).

Los puntos clave que se cubrieron en este módulo son los siguientes:

- El proveedor puede editar datos clave en las ventanas Detalles de SNI (SNI Details) y Detalles de SNI – vista de producto (SNI Details – Product View).
- El proveedor puede editar en varias disposiciones de cuadrícula:
  - Editar detalles por Ubicación asignada y Proveedor de datos.
  - Editar detalles por Proveedor, Ubicación de origen y Proveedor de datos.
  - Editar todo.
- A través del Método de transferencia de archivos, el proveedor puede hacer una carga masiva de datos.

# Comparación de stock y ratios históricos

### Objetivos del módulo

Después de completar este módulo, usted podrá comparar el stock y los ratios históricos ingresados por socios externos.

La ventana *Comparación de historial de SNI* (SNI History Comparison) le permite visualizar la comparación de los ratios o del inventario de dos momentos en el pasado.

El historial de inventario puede visualizarse en dos ventanas de SNI:

- Comparación de historial de SNI (inventario)
- Comparación de historial de SNI (ratios)

### Comparación de historial de inventario (continuación)

Las ventanas *Comparación de historial de SNI* (SNI History Comparison) utilizan criterios de selección para mostrar resultados de comparación de historial:

- Fecha del historial (History date): las fechas para las cuales se muestran los ratios o los datos de inventario.
- Objetivo de tiempo para la comparación de historial (Time horizon for the history comparison): el historial anterior se selecciona automáticamente al comienzo del objetivo. La fecha del historial posterior, más la duración del objetivo de tiempo, se selecciona al final del objetivo de tiempo.
- Las columnas de la comparación de historial se configuran automáticamente a diario.

### Comparación de historial de SNI: inventario

La ventana *Historial de SNI (inventario)* (SNI History Comparison [Inventory]) muestra el Historial de comparación (Comparison History) para los criterios seleccionados. En el ejemplo a continuación, los valores del stock disponible el 10.09.2013 frente al 19.09.2013 se muestran para su comparación:

|   |                |            |            |         |          |             |              |             |            | View      | r: [Standard View] | ▼   Print  | Version Exp | oort 🖌 🌾 🔑 |

Las instrucciones detalladas sobre cómo **comparar el historial (inventario)** se pueden encontrar en el sitio <u>Supply Network Collaboration Training</u>.

### Comparación de historial de SNI: ratios

La ventana correspondiente muestra los ratios para los criterios seleccionados. En el ejemplo a continuación, los valores de los ratios del 10.09.2013 frente al 19.09.2013 se muestran para su comparación:

| Key Figures                                 |                 |         |            |            |            |            |            |            |            |            |            |            |            |            |            |               |

Las instrucciones detalladas sobre cómo **comparar el historial (Valores clave)** se pueden encontrar en el sitio <u>Supply Network Collaboration Training</u>.

Los puntos clave que se cubrieron en este módulo son los siguientes:

- Comparación de historial de SNI (inventario)
- Comparación de historial de SNI (ratios)

### Alertas de SNI específicas del usuario

Luego de completar este módulo, usted podrá:

- Visualizar una regla de alerta de SNI.
- Activar manualmente la generación de una regla de alerta de SNI existente.
- Crear una nueva alerta de SNI.
- Modificar una alerta de SNI existente.
- Crear una nueva regla de alerta de SNI.
- Eliminar una regla de alerta de SNI existente.

El flujo de trabajo de las alertas de SNI específicas del usuario es el siguiente:

- El usuario crea una Regla de alerta de SNI específica del usuario (User-specific SNI Alert Rule) en la ventana Reglas de alerta de SNC (SNC Alert Rules).
- SNC activa una alerta cada vez que la situación no cumple con la regla de alerta.
- El usuario visualiza la alerta en SNC y la resuelve, si es posible.

Las reglas de alerta definidas por el usuario se definen para situaciones comerciales específicas no admitidas por el conjunto estándar de alertas de SNI.

### Alertas de SNI específicas del usuario (continuación)

El comprador realiza las siguientes actividades para administrar las alertas de SNI específicas del usuario:

- Visualiza una regla de alerta de SNI existente.
- Activa manualmente la generación de una regla de alerta de SNI existente.
- Modifica una regla de alerta de SNI existente.
- Crea una nueva regla de alerta de SNI.
- Elimina una regla de alerta de SNI existente.

Para visualizar una regla de alerta de SNI existente:

 En la ventana Monitor de alertas (Alert Monitor), haga clic en la pestaña Excepciones (Exceptions). De la lista desplegable, seleccione Reglas de alerta de SNI (SNI Alert Rules).

## Activar manualmente alertas frente a una regla de alerta de SNI (continuación)

4. Haga clic en **Sí** (Yes) para confirmar que la alerta debería generarse con una tarea en segundo plano.

| Create alerts.   |
|--|
| Are you sure you want to create alerts for rule with           |
| Test Rule 1? Alert generation will be run as a background job. |
|  |
|  |
| Yes No   |

Las instrucciones detalladas sobre cómo **modificar una regla de alerta existente** se pueden encontrar en el sitio <u>Supply Network Collaboration Training</u>.

Las instrucciones detalladas sobre cómo **crear una nueva regla de alerta** se pueden encontrar en el sitio <u>Supply Network Collaboration Training</u>.

Alternativamente, para crear una nueva regla de alerta de SNI:

 En la ventana Monitor de alertas (Alert Monitor), haga clic en la pestaña Excepciones (Exceptions). Del menú desplegable, seleccione Reglas de alerta de SNI (SNI Alert Rules).

## Eliminar una regla de alerta de SNI existente (continuación)

3. Aparece el siguiente mensaje. Haga clic en Sí (Yes). La regla se elimina.

| Delete inventory rule.  |
|---|
| Are you sure you want to delete rule with id:<br>Test Rule 4? |
|   |
|   |
| Yes No  |

Los puntos clave que se cubrieron en este módulo son los siguientes:

- Visualización de una regla de alerta de SNI.
- Creación de una nueva alerta de SNI.
- Modificación y eliminación de una alerta de SNI existente.
- Creación de una nueva regla de alerta de SNI.

Los puntos clave que se cubrieron en este curso son los siguientes:

- SNI admite a todos los socios comerciales para el monitoreo de las posiciones de stock en toda la cadena de suministro dentro de un ciclo de planificación.
- Los socios externos envían datos a SNI a través de informes en línea o a través del Método de transferencia de archivos.
- Las posiciones de stock actual y proyectado pueden monitorearse en SNI.
- SNC mantiene datos históricos de inventario y ratios para su comparación.
- Las situaciones de excepción activan alertas.
