3M™ Engineered Films. Applied to almost anything worth protecting.
3M™ Industrial Protective Films 7070UV & 7071UV.
Helping your products get through life unscathed.

The world can be a very harsh place. UV rays. Fingerprints. Foot traffic. Everyday scratches and scuffs and dings. It all adds up to shorter life spans for all but the toughest materials. Now there’s a way to help almost anything you make get through life unscathed: 3M™ Industrial Protective Films 7070UV & 7071UV.

These specialty engineered films from 3M are designed for one thing: Long-term protection for the surfaces of your products.

- Creates a highly durable, transparent shield—without obscuring your surface design
- Becomes a tough part of your product’s outer skin
- Helps maintain your product’s new-looking appearance
- Less maintenance for your customers and potentially fewer warranty claims
