

Tough Mining Environments Demand a Tough Tape

Scotch® Heavy Duty Mining Tape 31 has a tough, abrasion-resistant backing for jacket repair on mining cables. Mining cables are exposed to extremely abrasive environments which often results in the damage of their original jackets. MSHA-approved Scotch® Heavy Duty Mining Tape 31 offers an innovative solution for cable repair. With its abrasion-resistant properties and flame retardant mastic, Scotch® Heavy Duty Mining Tape 31 applies easily and remains flexible while maintaining a strong moisture seal.

Flexible, quick on-site cable repairs

Scotch® Heavy Duty Mining Tape 31 is approved by P-07-KA080005-MSHA (Mining Safety & Health Administration) as the outer jacketing of the 3M™ Mining Tape Splicing Kits 3100 Series. The tape is printed with the MSHA logo/approval number.

Scotch® Heavy Duty Mining Tape 31 allows for on-site, quick repair of mining cables.

The properties of Scotch® Heavy Duty Mining Tape 31 are identical to those of Scotch® Cable Jacket Repair Tape 2234. Scotch® Cable Jacket Repair Tape 2234 does not have the MSHA logo/approval number printed onto the tape.

Benefits:

- On-site, quick, universal cable repair
- Abrasion, water, UV, chemical and oil-resistant, heavy duty backing
- Moisture-resistant, self-healing, flame retardant mastic
- MSHA approved
- Breakdown Voltage 15.7 kV/mm

Uses:

- Repair of mining and other electrical cable jacket. Suitable for flexible and non-flexible cables
- Cable jacket repair in extremely harsh mining industrial environments
- Repair and splicing of mine conduit
- Buffer to protect cables in areas where there is vibration or movement causing friction
- Instantly seals and protects UV damaged cables where sheath has faded and split
