

# Connection Centre

For Dental Labs

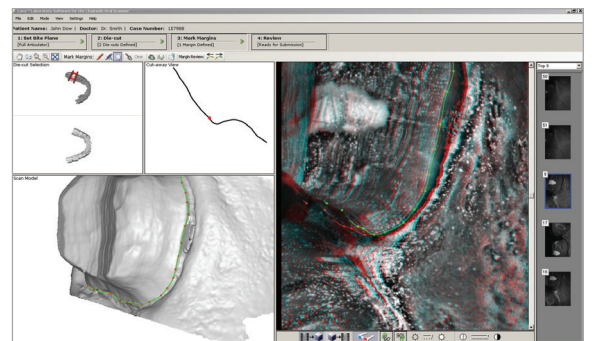

## A digital hub for labs and dentists

Work the way YOU want with digital impressions from the 3M™ True Definition Scanner.

The 3M™ Connection Centre is the secure, cloud-based digital hub where dentists upload, store and share prescriptions and digital impressions from the 3M True Definition Scanner.

For traditional work, you simply start with a model made from the digital impression. For CAD/CAM work, you are not boxed into one system. You can rely on trusted and integrated workflows for seamless CAD/CAM production. Or, you can receive an open STL file for import into other systems.

Regardless of how you work, the 3M Connection Centre offers the flexibility you need.

3M™ Margin Marking Software is a trusted and integrated digital solution. You can quickly and accurately mark the margin with stereoscopic 3D images.

# 3M™ Connection Centre Standard Lab package.

## Standard Lab Package

The Standard Package provides unlimited access to the 3M Connection Centre, and allows you to work with a wide variety of design and production solutions.

- Purchase a stereolithography (SLA) model from a trusted model production centre. This gives you the ability to create traditional restorations using a digitally produced SLA model.
- Track status of outsourced services with the audit-trail feature of the 3M Connection Centre.
- Unlimited access to the 3M Connection Centre. This gives you access to scan files, prescription information, and full workflow visibility.
- License for the 3M Margin Marking Software. This gives you the ability to mark margins, set articulation planes, and ditch and die cut models (after completing software training).
- Secure access to open STL files. The 3M Connection Centre is the hub for open workflows where you can obtain open STL scan files that can be readily integrated into a variety of digital workflows—allowing you to leverage your existing investment.
