Disinfecting Cap for Needleless Connectors

## Hates dirty. Loves clean.

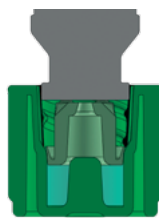

3M™ Curoso Jet™ Disinfecting Caps are the next-generation solution for needleless connector disinfection. Meeting the high-efficacy standards of all Curoso devices, Curoso Jet disinfecting caps utilize a spray of 70% isopropyl alcohol (IPA) to disinfect all critical surfaces of needleless connectors.

Curoso Jet disinfecting caps are intended for use on needleless connectors as a disinfecting cleaner prior to line access. The device will disinfect the connector one minute after application and protect from contamination between accesses for up to seven days if not removed.

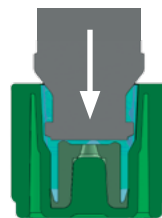

To disinfect any needleless connector, just peel the foil strip from the Curoso Jet disinfecting cap and twist it on.

When twisted onto a needleless connector, Curoso Jet disinfecting caps actively spray IPA.

Unengaged

Engaged: IPA released

Disinfects in  
**1 minute** –  
protects ports  
for up to **7 days**.

### Improved Fit

Curoso Jet disinfecting caps twist on easily and stay securely in place on commonly used needleless connectors, including the uniquely threaded Smartsite® needle-free valve.

### Easier to Handle

A high profile makes the Curoso Jet disinfecting cap easy to handle when wearing gloves.

### Convenient Dispensing

Curoso Jet disinfecting caps are dispensed as individual caps or on a convenient five-cap strip which can be hung from I.V. poles for easy access.

### Designed for Patient Comfort

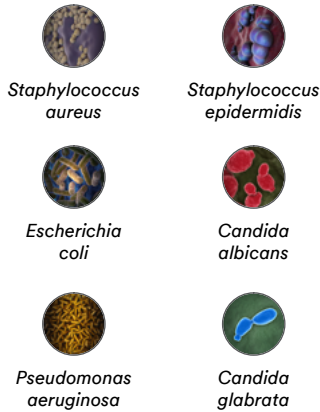

Curoso Jet disinfecting caps' rounded edges may improve patient comfort.

### Colored Bright to Disinfect Right

Curoso Jet disinfecting caps are brightly colored, making it easy to verify that a port is clean at a glance. Disinfection compliance can be easily and reliably measured.

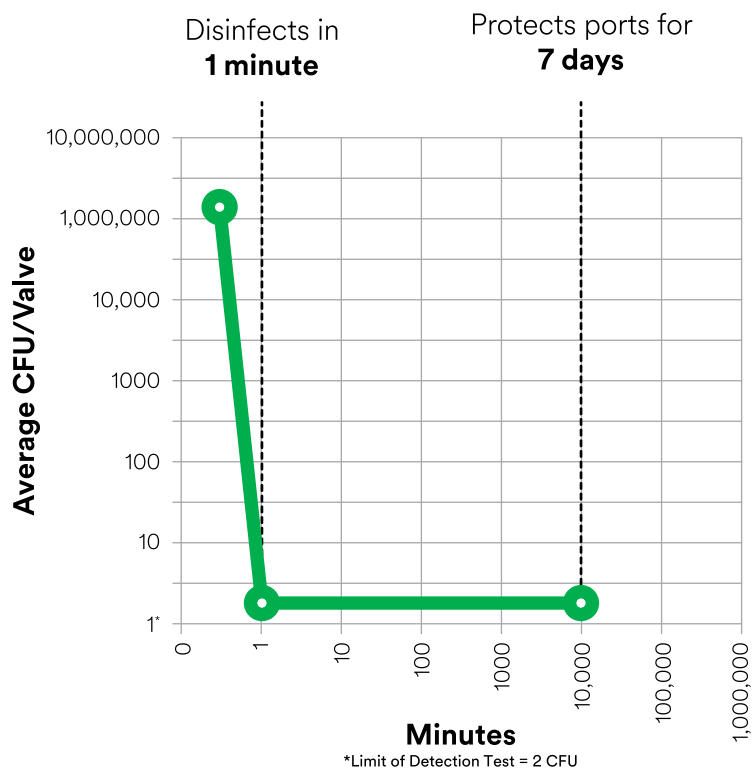

# 3M™ Curoso™ Disinfecting Port Protectors achieved a 99.99% reduction in 6 microbes commonly associated with CLABSI

The effectiveness of Curoso products was tested *in vitro* against<sup>1,2</sup>:

**STUDY CONCLUSION:**  
All test samples exceeded the minimum 4-log reduction after one minute.

Studies were conducted at independent laboratories.
